The Dailn Pritish at hie. WEDNESDAY EVENING, AUG. 27.

Memphis is not only affected by fever but by the unreasonable, unruly, outbreaks of her negro population. Charity is being generously exercised, but it is questionable charity which can countenance the feeding of a lot of men who appear to suffer only from a severe attack of laziness. The lawlessness of a number of the colored people does not improve the situation.

What can be the sense of recommend ing Protection as a cure-all for the agr cultural depression of England when the N. P. has utterly failed to improve the position of the farming community of Canada! Good crops would be of much more advantage to the Mother country at the present time than any questionable legislation which may be suggested as a papacea for hard times.

A Deputy-Inspectorship of Weights and Measures is a thin enough reward for the political service rendered the Tory party by Mr. J. A. Wilkinson, of the West Durham News. A salary of \$500 per annum is certainly not what we should expect if we were J. A. Wilkinson (which thank fortune we are not tor gaining the doubtful honor of being the most heroic slanderer of the age.

The Boston Herald entertains the opin ion that the claim put in by the United States for alleged interference with the American fishermen in Fortune Bay i excessive and extravagant, and it con tends that the Geneva Court of Arbitration effectually settled the inadmisability of consequential damages arising from an apprehension of violence. The Americans seem to have an excellent case-on paper. Our "cousina" are given to suffer much from imaginary grievances. This Fortune Bay outrage will not, 'tis evident, bear the light of accutiny.

...... The Globe contends that the Pacific Railway can be built more economically from Canadian resources than by a scheme which will place the best farming lands it. the hands of speculators, who will hold on for high prices. If the burden of carrying the line through in a few years is thought too great to be borne, those portions necessary to the development of the fertile territories can at any rate be pushed on without delay. It will be well for the Government to refrain from any rash bargain by which English capitalists may gain an enormous power to hinder the settlement of the North-West, and well for the capitalists themselves to make crose enquiry before they use their money to purchase a "pig in a poke."

The wet season was very favourable to our hay harvest, because in general we are rather deficient in the moisture requisite for grass. At the same time it has ruined that crop in Ergland, where a redundancy of rain is the most frequent cause of complaint. Great improvements have been recently made in hay pressing-machines, among others one which gives the truspes a cylindrical form and permits of easy rolling by handling. The export of hay to England shows how little dependent we now are on the single market of the United States.
