TRAIN WRECKING-

Among all the forms of crime at present unfortunately but too prevalent in Canada none is more wanton or more deserving of the severest punishment than train - wrecking. It is worse than tucondiarism or in fact any other destructive crime short of down-right murder. It is, indeed, possible murder, planned and executed in cold blood, tuted a suit in the Court of Common without the slightest feeling against the Pleas against the Canada Central Railunauspecting victims of the devilish pur- way Company for \$150,000 damages pose of destruction of both life and prosperity. The intentions of the would-be murderers, however, were just as bad, although they were so for tunately f.ustrated. We hope the in human fiends will yet be identified, and that as a deterrent against so henious a crime they will be punished with the utmost vigor of the law.

A MISSION TO WASHINGTON. Sir Samuel Tilley will soon be off to Washington, perhaps to threaten more retaliation in the matter of his terrortariff; perhaps to sue for reciprocity so as to afford him and his colleagues a chance to back down from the impossible and hurtful policy to which they stand committed, and which, indeed, got them their present places. It was chocky enough for Sir Samuel and Sir John to go to England, there to attempt to hoodwink the British people into the verdant which netted \$478 Three reinvestments erpool between the Ship Laborers' Bene. belief that a tariff which was intended to keep out all ontside manufactures, was not unfavorable to Britain, because it was even more hostile against the United States. But after all the vituperation against the latter, and the avowed determination to punish our neighbours into reciprocity, with what face can any member of the present Canadian Minis try go to Washington and hope to succoed with any sort of negotiation, friendly or otherwise ? The best and only course eyen to our war sariff Ministry is to appoint an Agent General for the United States, a la Sir Alexander Galt in England, and instruct him to convince our insecont neighbours that the Tilley tariff was after all intended to be friendly to them, or that it never would have been adopted but for the exigencies of a dwind ling revenue caused by a succession of bad seasons.
