The Daily British Whig

SATURDAY EVENING, MARCH 16, 1878.

CITY AND VICINITY

GOLD in New York at 3 o'clock 100.

MILITARY COLLEGE.—In Parliament yesterday it was announced that there were 44 cadets in the Military College.

NO JUDGMENT.—In the case of Moyle v. Kingston, in Queen's Bench yesterday, judgment was not delivered.

HEAR the St. Patrick's Society Concert and Dramatic Entertainment, Monday night. Mrs. Hackett will positively appear.

THE PENITENTIARY.—The House Commons yesterday, while in Committee of Supply, passed an item of \$130,646 for the Kingston Penitentiary.

POLICE.—John Clancy, one of Kingston's most annoying young men, was committed as a vagrant for six months, and fined \$50, in default to receive a further imprisonment of six months.

SCHOOL ESTIMATES.—The Belleville Board of School Trustees require \$15,925 for this year, out of which they propose to spend \$2,500 for a new primary school building in Coleman Ward.

THE NEW YORK HERALD says: "We vastly preferred Mr. Hackett's rendition of the 'Sleep Walking Scene,' to that which Mrs. Scott Siddons offered us recently." Hear her on Monday night.

FARM SALES.—This morning Mr. W. Murray sold two farms in pursuance of Chancery decree. The first, the Ellerbeek farm, was purchased by Mr. Miles Grimshaw for \$5,025; the second, the John Dawson farm, was disposed of to Mrs. William Grimshaw for \$4,000.

THE PROTO-MARTYR.—On Monday evening the Rev. Mr. Chambers, of Portsmouth, will deliver the last lecture in connection with the Y.M.C.A. this season. The subject is "The Proto-Martyr," and we can confidently expect an interesting essay from the reverend gentleman.

SURVIVOR.—Mrs. Dunk, wife of Louis Dunk, residing in the Township of Seymour, near Campbellford, committed suicide in the evening of Thursday by drowning in a creek. She had only been married for about ten minutes, and when discovered life was extinct. Cause, temporary insanity.

A VACANCY.—By the recent death of Mr. Donaldson, engineer of Rockwood Asylum, a vacancy occurred in the Municipal Council of the Village of Portsmouth. That vacancy will be filled by an election which takes place on Monday, and in which the honours lie between Messrs. James Campbell and Richard Howard.

MAGAZINES.—In the magazine of periodical literature the Monthly has always been a favourite and deservedly so, since the general contents are designed to be specially interesting to them. The special plates do also form a characteristic and appreciative feature. In the April number, the frontispiece, "At the feet of Champeiro," is a bewitching picture.

HARBINGERS OF SPRING.—The sweet and welcome notes of our feathered songsters can now be heard in the early morning, being the sure harbingers of genial spring. It remains to be seen whether they will gain admission to the city gardens, now that the sparrows have become so numerous, for, as is well known, once they get possession of a place they manage to retain it.

CONSOLIDATION.—A meeting of the Committee of the County Council, who have the consolidation of the municipal debt in hand, met on Thursday last, and a considerable time was occupied in discussing the schemes presented by Messrs. J. R. Dawson and Mr. Strachan respectively. At the June session the matter is to be disposed of some way or other.

ST. PATRICK'S DAY.—To-morrow the anniversary of St. Patrick's birthday will occur, and beyond an appropriate service, we presume the day will quietly pass away. In some places the anniversary will be observed on Monday, but in Kingston the event will be commemorated in a very acceptable fashion—viz., by a concert in the City Hall in the evening, which we hope will be very largely attended.

KINGSTON HARBOR.—A correspondent of the Pictou Gazette, writing from Kingston, refers to the early opening of the harbour here, the clearance being there less than that which occurred since the building of Fort Frontenac in 1672. How the correspondent knows this is not stated, and we accept the statement with about as much assurance with which we accept a deal of the other twaddle which is printed under the same heading, and apparently coming from the same pen.

THE CONVENT.—We have only a word to say by way of a reminder of the Concert on Monday evening. Nothing beyond that is necessary. The arrangements and the programme are good, and the attendance on such occasions has never been known to fall or fall short of expectation. Most anxious are we that Mr. Hackett's readings should be heard. It may not be generally known that she is a native of Wolfe Island, and that she is now one of the stars of the theatrical profession.

POPULAR READER.—Mr. Robertson, whose cheap publications have secured a wide circulation and reading, has extended the happy idea of combining Mr. Tinsley's "Idle Excursions" with a select series of Will Carleton's poems in one edition, so that within one cover there are really four books, each and all being arranged at a high place in the public estimation. Both Tinsley and Carleton are names quite familiar to us, but no more familiar than these late productions of his pen, if read with the same pleasure as we have pursued them.

WIND WAITS

—Beautiful, beautiful spring. —Tom Bolger is in the city. —Forecasting will soon be commenced. —There was a very large market this morning.

—The rambles of Captain Creighton are to be continued this year.

—Captain Kirwan, of True Witness fame, lectured last evening in Fifth.

—You can buy the most groceries at the best quality for the least money at Redden's China Tea House.

—Belleville trustees are talking of abolishing corporal punishment in schools. They may spare the rod and spoil the children.

—Dr. Burns, of Halifax, will lecture on Thursday evening next in Chalmers' Church, on the Restoration and Annihilation Theories of the age.

—Sobell & Kinghorn, of Cape Vincent, are making arrangements for the manufacture of lager at their brewery this summer.

—Work at Westminster Park is progressing finely. The chapel will be built 100 feet above the river and will cost \$3,000.

—"At what age were you married?" remarked one lady to another, as they were passing up street. "At the parsonage," she meekly replied.

—There is better satisfaction got for the money at Redden's than in any other store, as tea and coffee are fresh, and sugars and canned goods uncommonly cheap.

—It is said children's comfort will be consulted if they are allowed to wear shoes without heels until eight or ten years of age. The comfort of some children is consulted by allowing them to go barefooted in the early part of their career.

—A case of highway robbery occurred in Watertown on Friday night. A young man, taking a moonlight stroll, was pounced upon by women and robbed of \$2.10. They got away while the young man was running for the police.

—If he is the Rev. A. J. Bray, he knows all about "bluff." The Montreal Spectator says, editorially, "The Lieutenant Governor has played his trump card—but played it badly, and stands to lose the game." Well raise him fifty on that! The deal is worth something.

Reception Service.

Last evening the series of revival services in Sydenham Street Church were brought to a close by receiving on trial, for three months, those who desired to connect themselves with the Church, such being the usage of the Methodist body. The service of song was conducted by Rev. Mr. Crozier for a short time. After prayer by Rev. Mr. Galbraith, he read the 116th Psalm, then the reading of the Church, explaining the meaning of each. He invited all who were desirous of connecting themselves with the Church to come forward to the front seats. Twenty responded, and Rev. Mr. Carroll, by request, delivered the charge. He related some of the events of his own experience when he first joined the Church, upwards of half a century ago. For fifty years he had been a minister, and he could truthfully say that the same power is in the Church now as in the past, and the Methodist still a revival Church. He urged the new members to avoid the amusements of the world and the frivolities of dress.

Debating Society.

The regular meeting of the Literary Society was held in the Collegiate Institute building last evening. After making some arrangements for the entertainment to be held on the 29th, the debate was proceeded with. The subject was, "Protection vs. Free Trade," and some very good arguments were advanced in favor of both sides. Messrs. Shibley and Gordon marshalled one side and Messrs. Spink and Britton the other. The chairman, Mr. A. P. Knight, the President of the Society, gave his decision in favor of Protection, the weight of argument being on that side. Readings will be given next evening by Messrs. Duff, Hooper and others.

NEW DIARY.—The Gazette Herald comes to us this morning looking exceedingly neat and spicy in its new dress of type, the change being a most remarkable one, and such an improvement on the old form as not to admit of any comparison. While politically opposed to the Herald, we candidly accord to it all the credit it deserves for this indication of enterprise and prosperity. We are also glad to learn that similar improvements are to be made in the Herald weekly by the Belleville Ontario yesterday we learn that the new type for that paper has arrived, and that it will some of these days undergo transmigration. We are interested in the success of the Ontario, and it has our hearty good wishes for both fame and fortune.

SERIOUS ILLNESS.—The Intelligencer says that shortly before six o'clock Friday night Mr. W. F. Bland, organ manufacturer, was discovered by a boy in his employment lying insensible upon the floor of his office. Mr. Bland's illness was pronounced to be a cataplectic fit. He was above an hour later before he was restored to consciousness. During the night he continued very ill, and yesterday morning he was delirious. Mr. Bland may have been inebriated for several hours, as at 10 o'clock in the morning he felt unwell, and was going into his office to lie down, and from that time he had not left the office. Mr. Bland is a son of Rev. H. F. Bland, who while in Kingston learned piano and organ manufacturing and has for some time been doing a successful business in Belleville.

INTERESTING COMBUSTION.—Since Ven. nor's prophecies have exploded we are prepared for the insane ravings of a weak man; hence we take with a considerable degree of reserve, the declaration of a new and heretofore unknown humbug, that the great and continued rise in the earth's temperature during the past winter and present spring is owing to intensified combustion, which is progressing more rapidly than usual in our atmosphere. He says that there is a perceptible increase in the average volume of solar heat received during the three months ending March last, over the same period last year, and he predicts an early spring, heavy rains, with humid, hot summer.

ARREST OF MR. RINE.—A large and enthusiastic meeting assembled in the Bible Christian Church, Mitchell, last night to hear Mr. Rine, but for some unexplained cause Mr. Rine was arrested just as the meeting was about to open and conveyed to Stratford. Explanations are expected to be made to-day, as some friends have proceeded to Stratford to offer bail. Mr. Rine gives it to be understood that the charge brought against him is entirely without foundation.

A telegram from Stratford states that Mr. D.L.K. Rine has been arrested in the town of Mitchell, on a charge of criminal assault on the person of a young girl employed at a house in which he was a visitor.

MATHEMATICAL

THE CANON QUESTION.—The perimeter of a circle, and the length given by one revolution, will be respectively the base and perpendicular of a right angled triangle, the third side will be the length of groove in one revolution, and can be found by the ordinary rule. Then, as in similar triangles, the sides are proportionate to each other. The length given in making a whole revolution will be to the length given of part revolution as the whole revolution is to the part required.—MONTAGUE.

AN ENQUIRY.—As no one has answered my problem, am I to infer that neither "Mechanic," "A.H.W." nor "G.W.R." can work it, or that it is so easy as to be beneath their notice.—ALQUIUS.

THE CHURCHES

To-morrow Rev. Principal Grant will preach in the morning in Chalmers' Church, and in the evening the service in the same place will be conducted by Rev. Mr. Mowat.

The Rev. L. Fortin, agent of the Seaboard Mission of the Province of Quebec, will preach (D.V.) to-morrow on behalf of the Society, at St. James' Church at 11 a.m., and St. John's, Portsmouth, at 7 p.m.

Rev. Mr. Dyke, of the Collinsly P. M. Church, has returned after the interment of his late wife in London, but is unable, by ill health, to resume his ministerial labours. His appointments to-morrow will be filled by Mr. Teare, a pleasant and yet earnest speaker.

The Irish Societies—the St. Patrick's, the Shamrock Benevolent, and the Wolfe Island and Parnmouth Associations—will assemble at the St. Patrick's Hall at 10 o'clock, and march in procession to St. Mary's Cathedral, where they will take part in the 10-30 service. It is expected that either the Bishop or Rev. Father Leonard will preach, and the special reference will be made to the occasion for which they thus quietly but distinctively commemorate. The members of the different Societies will carry a badge of crape for the late Pope Pius IX., and the flags and banners, draped, will have a place in the altar.

There are some men here, it seems, cannot be made to understand the functions of a newspaper correspondent. These people write long letters—sometimes on matters of a purely personal nature, and with which they should not expect the columns of a public journal to be occupied. Others again make charges against officials and citizens, or anonymous signatures, and feel offended if the editor, in the exercise of his judgment, declines to publish the attack. Such a case occurred during the past week. An "Old Teacher" had much fault to find with the Inspector of Schools for the County, and in a general way accused the latter of many grave things, which he desired to have investigated by the Committee appointed by the County Council in connection with the complaint of one of the schools of the back country. We could not see what good purpose could be accomplished by the publication of the epistle in question, and we stated our reason for withholding it. To our mind the charges should not have been made at a newspaper office at all; if there was anything in them they should have been referred by the writer to the Committee direct, for newspapers were never intended to be the medium of communicating from one to another what cannot be sent direct and without such circumlocution. We have ever given the widest latitude to correspondents in the discussion of any matters of public interest, but really we think the writer should not be asked to use its space and influence for the spreading of the whims of any one who may fancy, or in reality may have a grievance, but who is not manly enough to meet his opponent openly and without disguise. "Old Teacher" has stopped his paper, but we will try and survive.

By the Liverpool Mercury, which reaches here yesterday, we learn some particulars of the 42nd annual meeting of the London and Liverpool and Globe Insurance Company. The retiring Directors met the Company with a satisfactory statement of the business transactions of the last twelve months. In the first department it was noted that the losses were heavier than usual, the configuration at St. John alone taking £96,000. The premium income, after deducting the sums paid for reinsurance of surplus risks, amounted to £1,052,465, an increase over the previous year of £22,720. The total losses, including that incurred by the St. John fire, were £272,373. In dealing with the surplus the directors have carried £150,000 from the Profit and Loss Account to the General Reserve and Fire Re-insurance Fund, which now amounts to £1,150,000. The premiums upon the new life insurances during the year amounted to £11,341, and the total premium income to £260,790. One hundred and twenty annuity bonds have been issued for a consideration of £92,842, granting annuities amounting to £2,922. The holders of 82 annuity bonds died during the year, relieving the Company of the annual payment of £3,862. The funds of the life department have been increased by £87,895, and now amounts to £2,825,966. It is proposed to pay a dividend of 10 shillings per share, together with a bonus of 4 shillings per share. The result of the year's business called for speeches reflecting credit upon the management of the affairs of the Company.

Extraordinary Scene in a Church.—An English exchange says.—A most extraordinary scene occurred at St. Paul's Church, Clapham, during morning worship yesterday. The Rev. Mr. Barton, a curate who had lately come to the parish church, officiated. During the earlier part of the service his wild and eccentric manner was noticed by the congregation, but as he proceeded it was more and more marked. The first psalm for the day he read in a loud and excited tone, and when he came to the verse, "The pains of hell got hold upon me, I shall find trouble and heaviness, and I will call upon the name of the Lord," suddenly stopped short, glared wildly at the congregation, and then throwing his arms around his head, shouted again and again, "I will call on him, Yes, my heaven, I will!" The congregation were greatly alarmed and the ladies present ran to the doors, while several gentlemen ran to Mr. Barton, who had fallen heavily from the reading desk to the floor. Ringing his hands, he begged that they would hold him down, and that he would not get up until he had been held down for some time. He was held down for some time, and then he was carried to a carriage and taken home. Several persons were hurt, though not seriously, by being crushed against the doors. Mr. Barton, entering the vestry in the morning, told the sexton he had not slept for four nights, and seemed unusually haggard and excited. He has, it is believed, been studying lately for an examination.

PROBABILITIES for the next twenty-four hours. Falling barometer and cloudy weather, with rain, followed by rising barometer, fresh to brisk westerly to northwesterly winds, clearing weather and lower temperature.

Nevertheless, the coarse gritty tooth powders and tooth-destroying chemical fluids find a place on the tablets of sensible people. The fragments of a sensitive Sassafras has superseded them all.

YOUNG LADIES' INSTITUTE.

As many of our readers know, the Ladies' Institute was started in January, 1877, for the purpose of supplying a want that had long been felt in this city. The fact of so many pupils attending it during the year shows sufficiently well the great necessity there was for establishing such a school, and prove also that the efforts of the gentlemen who undertook to start it have been fully appreciated by the public. At first it was intended that the school should aim at laying a good foundation in the various branches of an English education. Another object, however, was kept steadily in view. It was, that just as soon as a large enough number of pupils succeeded in passing the entrance examination of the Education Department, provision would be made for giving such pupils thorough instruction in more advanced subjects, such as French, Latin, Greek, Mathematics, National Philosophy, Chemistry, Physiology, English Literature, and, in short, all the subjects usually taught in the so-called Ladies' Colleges. We have much pleasure in announcing that this is to be done immediately. The Rector, A. P. Knight, M.A., will himself take charge of the Latin, Greek, and Chemistry classes, besides superintending the work of the other teachers, as he has done during the past year. A thoroughly competent teacher of French and German is about being engaged for the Institute, and the public may rest assured that nothing will be left undone, in order to ensure the success of the school, and guarantee that a liberal and a finished education shall be imparted to its students. The mathematics will still be under the charge of Miss Phillips, who has abundantly shown during the past year that she is in every way well qualified for the position which she occupies. The division of which this lady has charge will be called the Collegiate; that under Miss Henry, the Intermediate; and that under Mrs. Thomson, the Primary. The work of the Intermediate class will consist in preparing pupils for Miss Phillips' division, a duty which has been well attended to during the past year by Miss Henry. Indeed, the thoroughness of the work done in the Institute is clearly shown by the fact that of the 54 candidates who succeeded in passing the two entrance examinations of the year, no less than 36 from this school succeeded in passing. When it is remembered that there were in all 153 candidates, and that the total number passed was only 54, it will be seen that a very large percentage of the successful candidates were prepared in this school. This is a test all the more to its credit, inasmuch as it is one, which few indeed of the girls' schools could stand; it is also a thoroughly reliable index of the result achieved in the Ladies' Institute, because the examination questions were fully prepared in Toronto by independent examiners, and the answers were valued here by gentlemen not financially interested in the "passing" of a solitary pupil. The Primary division, under Mrs. Thomson's careful management, has also been a decided success. Her experience, her tact, and judgment in controlling the "little ones," and her close attention to their training, while at the same time she gave them that freedom which it would have been cruel to withhold from young children, have all combined to make her room a most desirable one to send young children to. Hereafter it is to be made entirely Kindergarten in its methods of instruction, and only a limited number of pupils will be admitted to it.

We have treated thus fully of the Young Ladies' Institute, for the information of our readers, and in the hope that before another year goes by it will be necessary to remove it, on account of the increased attendance, to even more commodious quarters than those which it now occupies. We hope to see it grow into a large Ladies' College, such as is being established in other cities of the Province. From every point of view, except that of a financial one, it has been a great success, and we understand that certain small changes are likely to be made, which will remove even this slight drawback, and enable it to triumph over this petty difficulty.

By the Liverpool Mercury, which reaches here yesterday, we learn some particulars of the 42nd annual meeting of the London and Liverpool and Globe Insurance Company. The retiring Directors met the Company with a satisfactory statement of the business transactions of the last twelve months. In the first department it was noted that the losses were heavier than usual, the configuration at St. John alone taking £96,000. The premium income, after deducting the sums paid for reinsurance of surplus risks, amounted to £1,052,465, an increase over the previous year of £22,720. An Open Letter. It speaks for itself.

Rockport, Mass., April 24, 1877.

Mr. Editor: Having read in your paper reports of the remarkable cure for Catarrh, I am induced to tell "what I know about catarrh," and I fancy the "suff," and "inhalant-tube" make (more dollar grabbers) would be glad if they could embellish a similar cure for the papers. For 26 years I suffered with catarrh. The nasal passage became completely closed. "Suff," "dust," "sassa," "inhalant-tube," and "suff," wouldn't open the catarrh, and I would sniff and sneeze, through at intervals I would sneeze, the only way compatible with common sense. Well, Mr. Editor, it did not cure me in three-fourths of a second, nor in one hour or month, but in less than eight minutes I was relieved, and in three months entirely cured, and have remained so for over sixteen months. While using the Catarrh Remedy, I used Dr. Pierce's Golden Medical Discovery to purify my blood and strengthen my stomach. A favorable notice in your paper of Dr. Sage's Catarrh Remedy induced me to purchase a package, and use it with Dr. Pierce's Nasal Douche, which applies the remedies by hygienic pressure, the only way compatible with common sense. Well, Mr. Editor, it did not cure me in three-fourths of a second, nor in one hour or month, but in less than eight minutes I was relieved, and in three months entirely cured, and have remained so for over sixteen months. While using the Catarrh Remedy, I used Dr. Pierce's Golden Medical Discovery to purify my blood and strengthen my stomach. A favorable notice in your paper of Dr. Sage's Catarrh Remedy induced me to purchase a package, and use it with Dr. Pierce's Nasal Douche, which applies the remedies by hygienic pressure, the only way compatible with common sense. Well, Mr. Editor, it did not cure me in three-fourths of a second, nor in one hour or month, but in less than eight minutes I was relieved, and in three months entirely cured, and have remained so for over sixteen months. While using the Catarrh Remedy, I used Dr. Pierce's Golden Medical Discovery to purify my blood and strengthen my stomach. While using the Catarrh Remedy, I used Dr. Pierce's Golden Medical Discovery to purify my blood and strengthen my stomach. A favorable notice in your paper of Dr. Sage's Catarrh Remedy induced me to purchase a package, and use it with Dr. Pierce's Nasal Douche, which applies the remedies by hygienic pressure, the only way compatible with common sense. Well, Mr. Editor, it did not cure me in three-fourths of a second, nor in one hour or month, but in less than eight minutes I was relieved, and in three months entirely cured, and have remained so for over sixteen months. While using the Catarrh Remedy, I used Dr. Pierce's Golden Medical Discovery to purify my blood and strengthen my stomach.
