Chills. Shakes. FEVER and AGUE.

Tarboro, N.C., 78.

Dear Sir-I feel very grateful for what your valuable medicine, Vegetine, has done in my family. I wish to express my thanks by in forming you of the wonderful cure of my son. and also to let you know that Vegetine is the best medicine I ever saw for Chills, Shakes, Fever and Ague. My son was stek with measles in 1873, which left him with Hip joint disease. My son suffered a great deal of pain all of the time: the pain was so great he did nothing but cry. The doctors did not help hit, a particle, he could not 'ift his foot from the floor, he could not move without crutches, I read your advertisement in the "Louisville Courier Journal" that Vegetine was a great benefit. He kept on with the medicine gradually gaining He has taken eighteen bottle sin all, and he is completely restored to health, walks without crutches or cane. He is twenty years of age. I have a young son, fifteen years of age, who is subjected to chills. When ever he feels one comming on, he comes in takes a dose of Vegetine and that is the last of the chill. Vegetine leaves no had effects upon the system like most of the medicines recommended for Chills I cheerfully recom mend Vegetine for such complaints. I think it is the greatest medicine in the world.

Respectfully, MRS. J.W. LLOYD.

THE CONVERZATIONE. - The Alma Mater Society of Queen's Cellege have in pre paration an excellent programme for the converzaione which closes the present session. The young men are exceedingly choice in all their tastes, and from the formality of invitation to the entertainment itself nothing will be omitted to make the occasion one of rare attraction and enjoyment.

DIFFERENT QUARTERS.—There are two clubs in the city-the aristocratic Kingston club and the less pretentious organization on the corner of King and Brock Streets. The latter body is a Club in itself, and has no communication with the saloon in the adjoining building, now occupied by Mr. Quinn, they having occupied their quarters before he became a citizen at all.

THE SUMMER RESORTS. - The novelty of the Thousand Island camp grounds has worn off, and pleasure seekers will be directing their attention to the old and still favorite resorts. The most thoroughly romantic and invigorating of all is that Canadian watering place, par excellence Cacouna. The St. Lawrence Hall is one of its best recommendations, and to-day it is announced that the hotel will be opened this season, and applications for rooms are at present in order

THE M. E. CHURCH. - At a recent mecting of the City Council a communication was read to the effect that the M.E. Church had virtually abandened the purchase of a lot from the Corporation -at least that the Church expected a reduction in the price, since property had, as a general rule, declined in value. We are completed as soon as possible, the terms originally intended.

A SINGULAR SCICIDE. -On Saturday telegram from Cornwall announced the suicide of a young man named Richard Craig, son of a tanner, he having shot himself with a gun in the abdomen. The circumstance recalls to our mind another matter- that some time ago another young man of Cornwall was sentenced to the Penitentiary for seven years, for a series of petty robberies from the Post Office in which he was employed. He was believed, before and during the trial, to have an accomplice; but it could not be proven, and all persuasion of friends and counsel failed to induce him to reveal the desired information. But when his fate was decided, when the sentence had been prenounced, he admitted to the Judge that the now deceased Craig had been a party to his criminality. The suicide of Craig is now taken as a result of the remerse which attended the conviction of his friend. We are informed that the young convict will probably be liberated at an early date, his conduct, since an inmate of the Penitentiary, being most commendable.

A MISSTATEMENT. - Our contemporary is correct when it says that the late Ro man Catholic agitation originated in consequence of the Devlin dismissal, but it makes a gress and wilful misrepresenta tion when it insinuates that political dif ferences existed between Catholic Reformers and the Reformers in the City Council. Rather the differences existed between the Catholic Conservatives and the Conservatives in the Council, from whom they expected favours. The stock is good, and Mr. some of its sainted members. It was to Armstrong will certainly be obliging to reconcile these difficulties that the Catholic all who may favour him with a call, and arrangement was planned -by Conservatives for Conservative purposes. We know what we are talking about, notwithstanding the back chat of our contemporary, which is but the echo of every passing opinion, some of which is no of

consequence. Not So. - The Brockville man, connected with the recent cockfight at Kingston, has called on the Kecorder and wishes it to state that the bet was paid in good Canada hard cash, and that the statement appearing in the Kingston Whiq about the payment of tens on the Consolidated Bank, was an unmitigated lie. SHAKSPEARE'S 'MACBETH.'

The following very interesting and intelligent criticism of Shakspeare's "Macboth," written by Mrs. J. H. Heckett, will give those who calculate attending

the entertainment of to-morrow evening an insight into some of the characters thus described which will be pourtrayed. As a literary work the subjoined will also

Silver Remonetization

The other day a member of the staff Whig became possessed of a piece metal somewhat resembling a silver coin, and he at once conceived the idea of palming it off as one of the new American silver dollars. It was announced that the first batch of silver coin had arrived, and took occasion to say that the thing was the greatest fraud ever perpetrated upon an innocent public. Several persons called to see the coin, and tho some did not like the ludicrous position in which the paragraph placed them, all Lappage will introduce this season into enjoyed the joke. Passing the Balkans.

A war correspondent, in narrating the

incidents of the passage of the Balkans,

particularly describes the craving of the Russian troops for sugar; the universal remark which passed round to cheer the despondent and to quiet the impatient, being. "We shall get sugar in Sofia." Can anything more strongly direct the attention to the ultimate effects of sugar in the body in sustaining the temperature under extreme degrees of cold? Animal food may have been scanty, but complaints did not arise on that score. Food has for a long time been deviced into the two broad classes of tissue-formers and heat-producers, the latter comprising mainly the carbo-hydrates. Parkes said that in the body thorough oxidation of albumen can never occur, as some constituents pass out of the system incompletely oxidised in the form of urea An ounce of sugar, on the other hand, is as a general rule destroyed to the fullest extent, and ends in carbonic acid and water, and its actual energy in the body, under whatever form it appears, is equal to its theological value.' It is always in the highest degree interesting to be able to confirm by experience the hypotheses that have been deducted from the laboraory. Had old Shylock been General Gourkho, he might not have been so anxious about his pound of flesh could he but have procured an ownce of sugar.
