Tenders are invited by Government ad vertisement for the construction of the Pacific Railway between Late Superio and the Pacific Ocean. Much time has been usefully spent in the prelimitary surveys and the careful location of route haste slowly? Although the fulfilment of the crasy ten-year promise was out the question with a Covernment which did not intend to plunge the country into hopeless bankruptcy, yet we may be sure the work of construction will now go safely and steadly on The approximate cost of the whole time will, it is said, be knows by December pext.

While in Canada there is for agricul tural implements a demand so vast that the "struggling" manufacturers of them \$3 per day being quoted as the price opinion of the Telegram on Messrs. offered in some localities for farm las Brown and Mackenzie would mislead bourers. On the other side the unemployed hands are wrecking vengeauce on the machines as the cause of their destitution. And yet that is the country of whose trade policy that of the Tory party in Canada is a wretched and indefinable mimiory.

The boat race between Hanlan and Ross, at least the incidents attending the frequent postponements of it, afford but little cause for congratulation to those who justly regard 'the oar' as the manliest of athletic sports, and that, too, the least contaminated by rowdyism and foul play Nothing can be said against the contestants or their respectable supporters. On the contrary, they are much to be com miserated on the rough treatment to which they have been subjected. The unavoidable postponement of the race day after day had, doubtless, something to do wich the eballitions of rowdysam to which we refer. The felsy was unavoid able, however, and none, we dare say, re gretted it more than the athletes themselves. That they should be put to the unavoidable incurvenience was bad enmigh, but that, in addition, they should be the objects of mob violence was simply and perfectly mexcusable. We sincerely h pe that the authorities will mete ou, the wholesome rivours of the law on those who have tried to bring discradit on a noble and maily sport

Earl Beaconsfield has learnt by successful experience at Berlin the value of speaking out his mind firmly and boldly. He says if England had done so at a sufficiently early stage neither the Crimean war nor that just closed would ever have happened. If all nations should act on the British Premier's limit we fear the 'firm bold words' would ensue in blows, and war be precipitated rather than averted. However the opinion, on this point of so eminent and successful an authority as we have quoted is evtitled to ail respect. ## CÆSARISM.

It is supremely ridiculous for the Tele. grum or any body else to speak of Mr Mackenzie as being "tied hand sad foot to the Grit Cesar's chariot wheels, i stead of acting independently and fearlessly." Still more abourd, if possib surtained in power by virtue of his dictator's mandate, which would as apeedily Brown to the above extent, would, true, be a collowal compliment to him, and this, we suspect, is very far from the intention of the Telegram. It is commony supposed that the people rose in as indignant remonstrance against the political turpitude of the last T ry Gove ernment, and hurled it from power; that in the most constitutional way the people unstalled Hon. Mr. Mackenzie and his colleagues in their places, and ever since sustained them with a handsome parilamentary majority. All this, according to our "neutral" contemporary, is a popular delusion. The Telegram, for one, disputes the fallacy, and shows that with an ascuteness that has no parallel for its success, and which is totally incompatible with the impulsive rashness which Tory critics have attribuied to him, the Hon. Geo. Brown is the greatest popular manipulator of the age, that he rules the people through an alleged but quite fictitious govern ment, the Governor-General, the Minis-

Go where he might, the Canadian people would be sure to hope for a deferment of his departure, so thoroughly has he attached all parties of our population to his person and regime. Ingenuity is on the rack for some unusual means of tess tifying to the appreciation and admiration of the Canadians to their retiring ruler, as witness the recent auggestion that a monater excursion of all the municipal bodies should repair to Quebec, there to pay the respects of the people to His Excellency on the eve of his departore from our shores. Go when he will he will carry with him the hearty good vishes for himself and Lady Dufferin of colonists who have learnt to appreciate their worth, and who will follow their future career with an unwaning interest. THE SCENE OF THE CRIME. Lacolle is about seven miles from Rouse's Point, which is itself about two miles across the boundary line. The smugglers on this occasion (at least socording to the statement of Mr. Nichols. Custom House officer) after having met at Lacolle, took a boat, placed in it the large trunk and value belonging to Matheron, and proceeded up the river towards Rouse's Point. On the way up they stopped at a secluded spot on Canadian territory, near Fort Montgomery, where they concealed their goods in a bush and then continued on their course the four millions of British American to the Point, sleeping that (Monday) night at De Merabel's. Again on Tuesday night the two men went on the river in a boat, o tensibly for Lucolle, but really to the spot near Fort Montgomery where the go als were hid, with the object, Nichols believed, of having them smuggled across the border in the night. It is supposed they landed at this spot, and that at this time the fearful tragedy was committed, and that Costotrolaz threw the mangled body of his victim into the river, under the impression that his work would be hid a sufficiently long time to enable him to fee the country. > GILES' LINIMENT IODIDE OF AMMONIA, new and great discovery, a remedy whose curative effects surpass any thing heretofore placed before the public. No family can afford to be without a bottle, for all are alike liable to an attack of the ills for which it has proved itself a sovereign remedy. Its equal has not been discovered for the cure of rheumatism, gont, diptheria, pneumonia, erysipelas, frosted limbs, sore throat, bruises of all kinds and wounds of every nature-indeed, the list of diseases which it is recommended to cure has scarce a limit.
