It appears that the great positive of the pills throughout Germany, as an apericul. a minus and alterative medicine, had provoked the malice of a mothecaries, who caused a report to be circulated that the metedients were poisonous Therefore, a scientific inquirminal at their nature and properties was ordered, the issues of which was a most triumphant vindication of the sanitar, value of the Pills.

The Faculty of the College state in their report that after a careful and minute examination. They have the honor to state that "the pills are not only free from every substance injurious to health, but are composed whelly of substances and elements promotive of digestion, and certain at the same time to act for vourably upon the nervous system, &c., &c.
