FAMOUS MUTINIES IN WHICH THEY HAVE FIGURED.

The Outbreak That Led to the Settlement of Pitcairn Island-Uprisings That Brought Death to the Ringlenders-A Fearful Flogging.

For reasons which will at once suggest themselves to every intelligent reader mutinies in the navy have almost invariably been more serious and determined affairs than similar outbreaks happening in the Bister service.

Almost everybody has heard of the mutiny us the Nore, which blocked up the trade of the Thames from May 27 until June 13, 1797, and left practically the whole of our southern scaboard to the mercy of an alien foe. This was undoubtedly the most serious outbreak that has ever taken place in our own, or, for that matter, in any other navy. The mutineers seized their officers, trained the forward "Some of our wild animals," said a guns aft, hoisted the red flag on the ad naturalist, "carry about with them all miral's ship, double shotted the broadside summer that which nature has evidently cannons and told off men with lighted intended as a substitute for their winter | matches at every porthole. WHEN WHISTLES WERE INSULTS.

Early Marine Engineering in the Inited States.

In 1830 gongs for the engine room were unknown, and in many of the boats, when one or on the deck over the engine room, he would signal to the engineer by the strokened a sick or came upon the floor of the house or deck. All boats of course carried bells, and by them all notices of departure and of arriving were made known, and all salutes between boats were given by their bells. To blow stram, as is now done by a whistly, was intended

to be a challenge or an insult. In July, 1837, the first steam launch, the Sweethwart, 33 feet in length, 4 feet 3 inches of beam and 3 feet depth, engine 4 by 12 inches, wheels 3 feet 6 inches in diameter and bother horizontal fire tubular, designed and constructed at the United States navy yard, New York, by the writer, then chief engineer of the succeeding trips around the city of New Fork was saluted with the bells of passing strambants and cheered by people, who rushed to the ends of the piers to witness the morel sight. She attained a speed of 5.5 miles per hour. The engine was subsequently transferred to the United
