ER FREIGHT RATES.

G. Thompson Speaks Hopefully of the Already Been Secured - Controlling Influence in the at Lawrence River frade -Other Marine Matters.

David G. Thompson, of the Montreal bransportation company, is in the city overlooking the company's plant here, prior to the opening of the navigation season, and conferring with Capt. Gaskin, subside manager, on matters pertaining portation business Mr. Thompson has on Canada's grain trade, and in fact in other lines of freight carrying In a short conversation with a Whig representative last evening he spoke very hopefully of an active season in freight traffic on the inland waters, the outlook being brighter than it has been for some years. A heavy movement in grain will begin as soon as the canals are opened, there being immense juantities in the west to come eastward. The elevators at Chicago are all filled; Duluch holds 20 000.000 bushels; Fore William 7,000,000 bushels, besides over onebands of the western farmers. Of this the a privilege to support a party. What ing a floor for Mr. Murphy and after the 30 Lawrence river route will receive ite due share, that is as much as can be re coived at Montreal.

The grain trade of the St. Lawrence is practically limited to ocean tonnage, which is in turn regulated by ocean freight rates or comparative rates between grain and lumber. What quantity of grain passes quantity taken by the trans-A'lantic sceamers. If the freight rates are good large quantities will be accepted, but it the owners secure better rates for other freight more deals will be taken and less grain. A certain quantity of grain is, Trees To Be Planted After The Hole Is however, always taken to reive as ballast. I or To-Let at McCaun's Real Estate and is expected that an increased number of ships will sail from Montreal this year; | held in the city engineer's office yesterday. sent occupied by Col.
