INTEREST TO FARMERS.

THE CONDITION OF THE CROPS DURING THE PAST YEAR.

There is a Growing Demand for Fruit and Honey-The Labor Market in a Satisfactory condition - The Grain Well Marketted-The Farmers Get the Fall Ploughing Done.

Rye .- The area is small, and this crop is not growing in favor. Owing to the drouth the yield falls short of the average.

New Fall Wheat. -The acreage in the province is about the same as that given it this year. The early harvest helped cultivation, and but for the drouth at the sowing period a wider area would have been devoted. The appearance of wheat on summer fallows is favorable, but on clay land a portion of the seed perished from lack of moisture. There was not much growth in October, and the braird is rather short, but on the whole the crop is fair. In the Lake Erie and Lake Huron counties the Hessian fly and the wireworm, the latter especially, have done harm, but elsewhere little injury is reported by in-

For indian corn, sorghum, beans and buckwheat the drouth proved too much.

Beans are an especially poor crop. Clover seed. - All accounts unite in reporting a complete failure. Injured in places by winter heaving, and the drouth told all over the province, and barren fields were the rule for the second crop which furnishes the supply of seed. Where the fields were used as pasture early in the season, and the second growth got a better start than if mown, a more favorable report is given. In many parts the midge assisted in the annihilation. Few fields set apart for seed will pay the expense of threshing.

Field Roots. - The drouth injured tubers and bulbs, and few of the roots will average more than a half yield. Potatoes did not suffer much from the bug, and not at all from rot. However, not only is the yield small but the tubers are also undersized, though sound and good for table use. Turnips were also injured by the fly.

Fruits.-Despite the hot summer the season was favorable. The apple worm was in many localities, yet the damage from insect pests has not been serious, and there will be a large surplus of apples, rather small in size but clean skinned and full flavoured. Many correspondents emphasize the increasing importance of the export trade. Wind storms, following the drought, caused a premature fall of the crop in the eastern part of the province. Plums report ed a fine crop, and peaches, pears and grapes more than fulfilled favorable predictions. Cherries have been a general failure. There is an increase of black knot in cherry and plum trees, especially in old orchards. Fruit trees are in surprisingly good condition, considering the trying season, although in the eastern parts young orchards show signs of succumbing to the long drain upon their vi-

Live Stock.—The poor pastures have had the usual effect despite supplementary feed. ing to a much greater extent than usuai. Stock, though thin, are thrifty, there being scarcely any mention of disease. Of fattening on grass there has been little or none, and farmers have sold to drovers and others such cattle as were saleable at low prices to avoid expensive feeding. There will, however, be a fair supply of stall-fed beef, but of inferior quality. Sheep fared not so badly on the short pastures, and are generally in good condition. Hogs suffered little from the unfavorable season. A larger quantity of pork than usual has already found a market. With careful economy there will be sufficient winter fodder in most parts of the province, thanks to a fair and well-saved hay crop and superior straw.

The Dairy. - The industry has been more successful than expected. High prices rule nearly the whole season for butter and cheese and as pastures were good and milk abundant until July, went far to compensate for the unfavorable latter part. Dairying is increasing in favor and extent in most parts, both in cheese factories and creameries. There is the usual diversity of opinion as to the best breeds of cattle for the dairyman. The "native cow" is declining in favor, though it is less certain which breeds will take her place.

Honey.-The yield was affected by the drouth, but latter part of October colonies were much stronger then expected. They ceased laying very early, owing to the absence of nectar from fall flowers. The bees have therefore been drawing upon their supplies since July. The large number of bees is due to this cessation of activity there being no incentive to work, so that many that would have otherwise died from hard work and exposure still live. There will be a great falling away in spring, but this will likely be counter balanced by thequeen after so long a rest starting to lay her eggs earlier, thereby supplying young bees to take the place of the dying. It will be prudent to winter bees in the cellar or other protected repositories, as they will hardly stand the exposure of an average winter. Make sure of the amount of honey colonies have, as they have consumed an unusual amount. The yield per colony, spring count, is much below the average, being about 25 fbs. The yield for the province, however, will be about the same as last season or two, as there are more concerned than formerly. The market for Ontario honey is continually extending, and the supply will no more than meet the demand.

Labour. - Except during a few days in the early grain harvest the supply of labour was in most cases equal to the demand, and farmers do not complain so much as in former years of high wages. The great majority of correspondents predict a fall, giving as the cause the poor crops and low prices, and consequent inability of employers to pay even present rates. A rise is predicted by a few in localities contiguous to lumber woods affected by lumbering operations. As usual domestic servants are everywhere

Marketing.—Early harvest, small crops, and more general use of steam threshing machines advanced operations. By the end of October the bulk of the grain of the province was threshed and a considerable quantity marketed. Owing to low prices for wheat only those pressed for money sold, but a large amount of barley has been disposed of since the rise in price. As the greater part is of a good colour this crop is turning out the most profitable this season. Fine weather kept many farmers in the fields at fall ploughing and drain making.

Fall ploughing. -The rain in October was general, and though the land was too dry and hard for ploughing for some time after in results, safe in all kinds of weather, and harvest, its condition of late has been so favourable that, taking the province as a whole, this branch is unusually well advanced. On heavy clay, where little rain had fallen, small progress has been made, but this extends over a small area. The season has remarkable for absence of injury by frost. The tender shoots were unscathed in the spring, and the latest grain crops were harvested weeks before the fall frosts appeared. The injury by insects is much lighter than in previous years, except damage to clover.
The absence of the pea-bug invites comment.

Invitation cards and folders in great variety at WHIG office.

IS MAN A BAROMETER

What is it That Certain Winds Always Make Rheumatics Cringe With Pain !

Eighty-six per cent. of the signal service weather predictions are accurate ! The only indictions our fathers had for

foretelling weather were aching limbs, twinging joints and painful corns ! These, though crude, were usually correct. The body is unquestionably an excellent

barometer, and physicians often prescribe a change of air so that the system may find an agreeable atmospheric condition.

Water changes indicate themselves by pains called rheumatism. Why bad weather should cause much pains is a mystery ?

Does the pain really lie dormant in the blood, to be made active only when the wind blows from some unfavorable quarter?

Last week a prominent man left town on a business trip. Two days later he, who had always been apparently strong and well, was sent home a corpse-"Rheumatism of the heart !"

Rheumatism is like the Indian in ambush, sure to kill you if not killed by you. It is to patient and physician one of the most vexatious of diseases.

At first many thought it to be a trouble of the joints, but all outward applications left the cause unbenefited.

Then, making like pains in the muscles, it was thought to be a muscular disease ; but the same unsatisfactory results followed external treatment.

Now, however, it is universally acknowledged that rheumatism is "a fiery condition of the blood caused by the presence of uric acid in the system !" Everybody dreads rheumatism.

It is very prevalent at this changing time of the year. It was formerly seldom known except among those who worked much out of doors. Now it invades the hut, the palace, the executive mansion, the senate chamber and the throne room; all sorts and conditions and races of men and women it attacks at all times, and all fear it !

Mrs. Swift (wife of Dr. Lewis Swift, the famous comet finder of Rochester, N.Y.,) was one of its recent victims; and how very common it is among ladies !

She suffered great anguish and fear ! Why does this acid remain in the system? The kidneys being diseased cannot remove the acid as in health, hence the system is poisoned by its presence, and rheumatic pains, stiff joints, tendons and muscles are the result. There is but one scientific treatment, to regulate the kidneys by Warner's safe cure, and to "put out the fire in the blood" by Warner's safe rheumatic cure. These world renowned remedies, taken by bottles in alternation, as they should be, neutralize the uric acid already in the blood,

and prevent further accumulation. Mrs. Dr. Swift used these remedies with great success, in alternation, and was com-

pletely restored to health. We understand that the proprietors guarantee them with the strongest assurances but this were scarcely necessary, for is not

their praise in everybody's mouth ? We cannot prevent the ill wind blowing, but we can get the better of it by so forti fying the system that we can ignore it when it is doing the worst to "give us a pain."

SERVICE IN CHALMERS

Mr. Goforth on Missions on Sunday-Needs of the Hour.

Rev. Mr. Goforth, after the pastor had opened the service in Chalmers' church on terday morning, made a missionary address upon the words found in Matthew VI, 9: "Thy kingdom come." In his opening remarks he said during the Franco-German war it was said the German people gave the government eight million of dollars to help them carry on the campaign successfully. These people did this to perpetuate an earthly kingdom, and surely we, whose souls are lighted with wisdom from on high, ought to do as much to perpetuate among our fellowmen a heavenly kingdom that will last forever. God has given us his gold to further his kingdom. If it be a good thing we pray for when we say "Thy kingdom come" surely we ought not only give our money but ought to give our life if need be, that our prayers may be answered and the object of our hearts accomplished. We can't find this treasure of God of ourselves ; others have tried and utterly failed, but when once gives it to us thus equipped nothing should prevent our making it known to our fellow-men, that the kingdom of God may come and His cause be advanced. Having this knowledge our joy is evinced when we come up to the house of God. The heathen has not this joy. The speaker then spoke of the small efforts that are being put forth by the church of God in Canada and other countries to evangelize Africa, India, China and other heathen lands. He pointed out by illustration and otherwise that the most of these countries are not only open, but actually asking for the gospel to be sent to the people. He also pointed out that some of the more ancient countries of Europe that a few years ago would not permit the bible to be read within their borders permitted of it now, and in these very countries the church of Christ had raised its banners and was doing a glorious work. The speaker, continuing, said the Moravian church set an example to the world in the matter of missions. Although comparatively a small church they had accomplished more successful mission work than almost. any church in the world. They sent one out of every fifty communcants as missionaries to the heathen. In addition to prayer we must put forth effort. Men can't go if they are not sent. Chalmers' church is above the average in its givings for missionary purpose. On an average the .members of this church give two cents a day each, and the preacher thought if they could only increase it to five cents a day it would amount to \$2,100 a year or enough to support two missionaries, one at home and one abroad. And the speaker hoped that they could try and by systematic giving do what he had suggested.

With Increased Knowledge.

Of the laws governing health and the treatment of diseases, resort to the physicians is less often made than formerly. Successful treatment can be made in such minor ailments as headache, biliousness, constipation, fluttering at the heart when sympathetic, foul breath, &c., all the various disorders resulting from deranged action of the liver and stomach, by the use of Hamilton's Pills of Mandrake and Butternut. These pills being entirely composed of vegetable extracts they form an admirable substitute for the numerous tonic bitters in the market. Hamilton's pills are mild in action, certain form the best family medicine extant. Sold by all dealers in medecine, and by N. C. Polson & Co., Kingston.

A Stitch in Time.

When first attacked with a cold in the head, droppings from the nasal passages into the throat, pain in the head, or any of the symptoms or forerunners of catarrh, a 50 cent package of Nasal Balm will cure

Harsh purgative remedies are fast giving way to the gentle action and mild effects of Carter's Little Liver Pills. If you try them, they will certainly please you.

WANTED, AT ONCE, 1,000 YOUNG MEN AND LADIES

To prepare for the HIGH and WELL PAYING SITUATIONS offered by the Directors of this College. We trust our readers are those for whom wealth has a charm, those who desire to EARN MONEY, and who are not afraid to work for it. In that case we will offer them a chance to

Coin Money More Rapidly, More Easily, and as Honorably as at Any Other Occupation.

The advantages we offer are so numerous, the power so mysterious and wonderful, that NO WONDER it has created such a wonderful impression on the minds of the Public This is no Humbug or Peddling affair, and WE WANT ONLY THOSE who are ambitious in life, those who are smart, energetic and industrious, as they alone are sure of success. A small capital, a short time to prepare, and satisfactory references are only required.

Address, by return mail, THE TORONTO BUSINESS COLLEGE, Cor. Yonge & Shuter Sts., Toronto, Canada.

Dr. J. Collis Browne's Chlorodyne.

THE ORIGINAL AND ONLY GENUINE.

ADVICE TO INVALIDS—If you wish to obtain quiet, refreshing sleep, free from headache relief from pain and anguish to calm and assuage the weary achings of protracted disease, in vigorating the nervous media, and regulate the circulating systems of the body, you will provide yourself with that marvellous remedy discovered by Dr. J. Collis Browne (late Army Medical Staff) to which he gave the name of CHLORODYNE, and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis and Asth

CHLORODYNE acts like a charm in Diarrhea, and is the only specific in Cholera and Dy

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache From Symnes & Co., Pharmaceutical Chemists, Medical Hall, Simla, Jan. 5, 1880. To J. T. Davenport, Esq., 33 Great Russell Street, Bloomsbury, London. Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility we must question whether a better is imported into the

country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and judging from their sale, we fancy that their sojourn there will be but evanescent. We could multiply instances "ad infinitum" of the extraordinary efficacy of Dr. Collis Brownes Chlorodyne in Diarrhosa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Cholera, Diarrhea, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of the opinion that the substitution of of any other than Collis Browne's is a DELIBERATE BREACH OF FAITH ON THE PART OF THE CHEMIST, TO PRESCRIBER AND PATIENT ALIKE.
We are, Sir, faithfully yours, Symes & Co., Members of the Pharmacy Society of Great Britain.
His Excellency the Viceroy's Chemists.

CAUTION—Vice Chancellor Sir Page Wood stated that Dr. J. Collis Brownews undoubt-

edly the inventor of CHLORODYNE that the story of the defendant Freeman was deliberately un true, which, he regretted to say, had been sworn to.—See "Times," July 13, 1864.

Sold in bottles at 1s. 1½d., 2s. 9d., 4s. 6d., and 11s. each. None is genuine without the words "Dr.

J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testi

mony accompanies each bottle. CAUTION—Beware of Piracy and Imitation.
