Struggle for Protection in

England. In January, 1846, the government of England (Sir Robert Peel, prime minister) introduced a bill to wholly abandon (with some limitation of time) the protective duties on grains, and gradually to apply the principles of free trade to manufactures and every description of produce. With the support of the Anti-Corn Law league, headed by Cobden and Bright, the bill passed the house of commons May 15, and on July 25, 1846, was successfully carried through the house of lords, chiefly by the influence of the Duke of Wellington. It was the last great pitched battle fought by the protectionists in Great Britain.

Does Friction Increase with Speed? In reply to the query, does friction increase or decrease with speed? Grimshaw answers: Both. When the speed is slow, increasing it may decrease the friction per turn; but where the speed is fast, it may be found that increasing speed increases the friction per turn also. There are two sides to almost every question, and particularly so in this case, The more viscous the lubricant, the greater pressure can be carried upon the bearing.

The President's Abode.

The "White House" is so called from the color which it has always been painted. The structure is of freestone. The bulk of the expenses of the White House are paid by the president out of his salary. There is a "contingent fund" appropriated by congress, which provides for the care of the grounds and the salaries of the public employes about the place.

A Peculiarity of 1888.

Next year (1888) will be a peculiar one in this respect—that the last three numerals which compose it will be the same figures, a circumstance which can occur only once in a century, or, more strictly speaking, once in every 111 years, as it will be 111 years before another "three of a kind" (1999) will be

Those men suffer less in the brain and nervous system who are able to cast aside all Dr. J. Collis Browne's Chlorodyne.

THE ORIGINAL AND ONLY GENUINE. ADVICE TO INVALIDS-If you wish to obtain quiet, refreshing sleep, free from headache relief from pain and anguish to calm and assuage the weary achings of protracted disease, invigorating the nervous media, and regulate the circulating systems of the body, you will provide yourself with that marvellous remedy discovered by Dr. J. Collis Browne (late Army Medical Staff) to which he gave the name of CHLORODYNE, and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered. and who spend their evenings in work of a

CHLORODYNE effectually cuts short all attacks of Epilepsy. Hysteria, Palpitation and CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache Menngitis, &c. From Symnes & Co., Pharmaceutical Chemists, Medical mail, Simla, Jan. 5, 1880. To J. T.

Davenport, Esq., 33 Great Russell Street, Bloomsbury, London, Dear Sir. We embrace this opportunity of congratulating you upon the wide spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility we must question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and judging from their sale, we fancy that their sojourn there will be but evanescent. We could multiply instances "ad infinitum" of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhoea and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Cholera, Diarrheea, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of the opinion that the substitution of of any other than Collis Browne's is a DELIBERATE BREACH OF FAITH ON THE PART OF THE CHEMIST, TO PRESCRIBER AND PATIENT ALIKE.
