THE CURIOSITY SHOP.

The Calendar—Pope Gregory Reckons Ten Days Ahead.

About forty-five years before Christ, Julius Caesar decreed that every fourth year should be held to consist of 366 days, for the purpose of using up the odd hours. Seeing that a day every fourth year was too much, it followed that the beginning of the year moved forward. From the time of the council of Nice, in 325, when the vernal equinox fell correctly on the 21st of March, Pope Gregory found, in 1582, that there had been an over reckoning to the extent of ten days, and at that time the vernal equinox fell on the 11th of March. To correct this, he decreed that the 5th of October of that year should be reckoned as the 15th, and to keep the years right in the future, the overplus being eighteen hours, twenty-seven minutes and ten seconds in a century, he ordered that every centennial year that could not be divided by 400 should not be bissextile, as it otherwise would be. The Gregorian calendar was decreed by Pope Gregory in 1582 on this basis, and was readily adopted by Catholic, though not by Protestant, countries. It did not obtain in Great Britain until 1752, by which time the difference between the Julian and Gregorian periods amounted to eleven days. An act of parliament was passed, dictating that the 3d of September that year should be reckoned the 11th, and that three out of every four of the centennial years should, as in Pope Gregory's arrangement, not be bissextile or leap years. The Gregorian calendar is in use in all civilized countries except Russia.

The Language of Stamps.

It is understood that when a stamp is inverted on the right hand upper corner it means that the person written to is to write no more. If the stamp is placed on the left hand upper corner and inverted, then the writer declares his affection for the receiver of the letter. When the stamp is in the center at the top, it signifies an affirmative answer to a question, or the question, as the case may be; and when it is at the bottom, or opposite this, it is a negative. Should the stamp be on the right hand corner, at a right angle, it asks the question if the receiver of the letter loves the sender; while in the left hand corner it means that the writer hates the other. The stamp at the upper corner of the right expresses a desire for acquaintance, and when placed on the lower left hand corner means a desire for friendship. It is said that those who are expert in this mode of indication, when a correspondent requests the person to whom he writes to accept his love, the stamp is placed on a line with the surname, and if the response is favorable the stamp is placed at the same spot, but reversed. Farewell to a sweetheart is expressed by placing the stamp straight upward on the left hand corner, and the continuance of the endearing relation is expressed in the same way. There are also erudite explanations as to the meaning of stamps resting on one another and various degrees of angles on various places on the envelope, but what has been furnished will probably suffice for a foundation.

Indorsement of Bank Checks.

A check drawn upon a bank payable to bearer is in a different position from a check drawn to order, although the latter may be indorsed by the person to whom it is payable before it is presented, or by the maker himself. Banks are justified in taking all proper means to avoid impositions upon themselves or customers. A check drawn to order and subsequently indorsed, is not, in our opinion, in the same position as a check drawn to bearer. The latter is, by the act of the drawer, made payable to anybody, and the bank is thereby notified, in effect that caution need not be made in ascertaining the right of the person who claims the payment. But a check drawn to order, even although it may be the order of the maker and indorsed by him blank, can only legally be the property of the person entitled under the indorsement. The fact of the indorsement may be taken to be a notification to the bank to be careful in ascertaining the right of the person who claims the money. Under such circumstances, it seems to us that the officers of the bank would be justified in requiring some proof or satisfaction as to the right of the person presenting the check to claim the amount.

The Earliest American Artist.

The first artist known to fame in the United States was John Watson. This we learn from William Dunlap's "History of the Arts of Design," where it is stated that Watson is the first painter of whom mention is made in the annals of American art. John Watson came from Scotland to Perth Amboy, in 1715, and died there in 1768, at the age of 53 years. He brought over a large number of paintings, and with these and many that he executed himself, he formed the first art gallery in this country. As he advanced in years he became extremely penurious and was totally blind for some time before his death. He owned two houses at Perth Amboy, one of which he used exclusively for his paintings, occupying the other as his residence. It is stated as somewhat of a coincidence that this house, which stood on the site of the present seminary, was subsequently occupied by another artist, William Dunlap, with whom originated the idea of the National Academy of Design.

Gilderoy's Kite.

The phrase "As High as Gilderoy's Kite" is supposed to have the following origin: Gilderoy, whom Bishop Percy calls "the Robin Hood of Scotland," was a noted freebooter who infested the highlands of Perthshire with his gang, and upon seven of his men being captured by the Stewarts of Athol, who executed them in February, 1628, Gilderoy burned several houses belonging to them out of revenge. A reward of £1,000 was then offered for his apprehension, and he was closely pursued, and eventually, with five of his companions, suffered for his crimes at Galloche, near Edinburgh, in July, 1638. There is no reference concerning any kite, and we presume that the phrase originated from the fact that Gilderoy was suspended at an unusual height, for, as the ballad says, he was "hung high above the rest."

Can't Open Each Other's Letters.

According to the United States Postal Laws and the United States Revised Statutes, neither a husband nor a wife has any right to open the other's letters, and the one that does it may be prosecuted under section 3892 of the revised statutes for so doing.

What is a Nonconformist?

For a time the Puritans during the reign of Elizabeth reunited themselves with the Church of England, but as they subsequently refused to be bound by the act of supremacy and of uniformity they became known as nonconformists.

East and West Points.

The most western point of the United States is Atton island, in the Behring sea, about 8,350 miles from the most easterly point, which is Quoddy Head on the east coast of Maine.

Gladstone's Age.

William E. Gladstone was born in Liverpool in 1809, and entered parliament in 1833.

Farm Prices of Agricultural Products.

In the December report of the department of agriculture occur the following statements in relation to farm prices of agricultural products: The average value of corn is 43.8 cents per bushel, against 36.6 cents last year, and 32.8 cents in 1885. In 1881 it was 63.8 cents. The average value of wheat is 69 cents, only three mills higher than the average last year. It is 82 in New York, 81 in Pennsylvania, 74 in Michigan, 73 in Ohio, 72 in Indiana, 70 in Illinois, 64 in Wisconsin, 62 in Missouri, 61 in Iowa and Kansas, 59 in Minnesota, 58 in Nebraska and 52 in Dakota. The average for oats is 30.7 cents, against 29.8 last year. Barley average 52.2, instead of 54 last year. Buckwheat, 56.1, or 1.7 cents higher than last year. The value of potatoes is greatly enhanced, being 68.5 cents, against 45 last year. It is higher than for several years, except in 1881. The value of hay is much increased. It averages \$9.34 per ton, against \$7.36 last year. The advance has been in the drought area of the west.

When baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

Not His Business. Political magnate (from the west, to waiter at Fifth Avenue hotel)—I say, I want a bottle of champagne, and be quick about it. Waiter—Dry, sir? Political magnate (very indignant)—Never you mind whether I'm dry; you bring that champagne.

The breath of a chronic catarrh patient is often so offensive that he cannot go into society and he becomes an object of disgust. After a time ulceration sets in, the spongy bones are attacked, and frequently, entirely destroyed. A constant source of discomfort is the dripping of the purulent secretions into the throat, sometimes producing inveterate bronchitis, which in its turn has been the exciting cause of pulmonary disease. The brilliant results which have attended its use for years past properly designate Ely's Cream Balm as by far the best, if not the only, real cure for hay fever, rose cold and catarrh.

To Avoid Baldness or Gray Hair. Use Dr. Dorenwend's Great German Hair Magic. It keeps the scalp clean and free from dandruff, and promotes the growth of the hair. It prevents premature grayness and stops all falling out of the hair. On bald heads, where the roots have not perished, it will invigorate them and force a new growth of hair. Ask for Hair Magic. It is the only reliable. For sale by J. G. King, A. P. Chown and all druggists.

Mere Scolding Had No Effect.

Mistress—"Why can't you remember, Bridget, when I tell you a thousand times? I don't like always to be scolding you for forgetting."

Amiable but forgetful domestic—"Faith, mum, you don't scold. It's quite pleasant you are, mum. The last lady I lived wid used to come out into the kitchen and stamp her feet and throw things at me."

Cold Feet.

Can be cured by Norman's Electric insoles. They are beneficial in all kinds of diseases because they tone, strengthen, and build up the nervous system. W. J. Wilson, agent, "The Pharmacy."

She Was Deceived.

"Your marriage surprised us all, Tillie!" "Very likely, but his constitution was so shattered, he was such an idiot, so ugly so ill-bred, and so utterly without principle that we all thought he was rich."

Unlimited.

The old or the young may at all times and all seasons of the year take Burdock Blood Bitters with benefit when requiring a blood purifying tonic, or a regulator of the stomach, bowels, liver or kidneys.

Pointed.

A Burlington teacher told one of her boys that the next time he wrote a composition there must be some point to it. The subject of his next disquisition was "Needles."

A Fatal Attack.

A fatal attack of troupe is a frequent occurrence among children. Every household should be guarded by keeping Hagyard's Pectoral Balsam at hand. It breaks up colds, coughs, croup, asthma and bronchitis in a remarkable manner.

Breck & Booth's is the cheapest place for pine blocks, bunchwood, hard or soft wood cut or un-cut.

HAVE THE KHEEL PLATE ONLY. To be had at D. F. ARMSTRONG'S, Princess Street. RUBBERS AND THEY WILL WEAR TWICE AS LONG.

It is our aim to please all that favor us with a call, and we consider it no trouble to show goods, whether you intend to purchase or not.

Dr. J. Collis Browne's Chlorodyne. THE ORIGINAL AND ONLY GENUINE.

ADVICE TO INVALIDS.—If you wish to obtain quiet, refreshing sleep, free from headache, relief from pain and anguish to calm and assuage the weary aching of protracted disease, invigorating the nervous media, and regulate the circulating systems of the body, you will provide yourself with that marvellous remedy discovered by Dr. J. Collis Browne (late Army Medical Staff) to which he gave the name of CHLOROXYNE, and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered. CHLOROXYNE is the best remedy known for Coughs, Consumption, Bronchitis and Asthma. CHLOROXYNE acts like a charm in Diarrhoea, and is the only specific in Cholera and Dysentery. CHLOROXYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms. CHLOROXYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Menstritis, &c. From Symmes & Co., Pharmaceutical Chemists, Medical Hall, Simla, Jan. 5, 1880. To J. T. Davenport, Esq., 33 Great Russell Street, Bloomsbury, London. Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility we must question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and judging from their sale, we fancy that their sojourn there will be but evanescent. We could multiply instances "ad infinitum" of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhoea and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Cholera, Diarrhoea, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of the opinion that the substitution of any other than Collis Browne's is a DELIBERATE BREACH OF FAITH ON THE PART OF THE CHEMIST, TO PRESCRIBER AND PATIENT ALIKE. We are, Sir, faithfully yours, Symes & Co., Members of the Pharmacy Society of Great Britain. His Excellency the Viceroy's Chemists. CAUTION—Vice Chancellor Sir Pigo Wood stated that Dr. J. COLLIS BROWNE was undoubtedly the inventor of CHLOROXYNE; that the story of the defendant Freeman was deliberately untrue, which, he regretted to say, had been sworn to.—See "Times," July 13, 1881. Sold in bottles at 1s. 1d., 2s. 6d., 4s. 6d., and 11s. each. None is genuine without the words "DR. J. COLLIS BROWNE'S CHLOROXYNE" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. CAUTION—Beware of Piracy and Imitation. Sole Manufacturer, T. J. DAVENPORT, 33 Great Russell Street, Bloomsbury, London E.C.

Dress Goods! Dress Goods!! A fine range of New Goods to select from at prices ranging from 8 cents to 60 cents a yard, in the leading styles and colors at ALEX. ROSS', Carpet and Millinery Warehouse. -OVERSHOES- AMERICAN AND CANADIAN, AT LOWEST PRICES. MOCCASINS FOR ALL AT HAINES & LOCKETT'S.
