WOOD AND COAL.

REMOVE D.

THE SUBSCRIBER begs respectfully to an-
nounce to his numerous friends and customers
that he has removed his old and established
Wood Yard from the Ferry wharf to the old
K. & P. Railway Depot at the foot of Ontario
Street, and
**Directly opposite the Tele du Pont
Barrack Gate.**

We are here to be glad to meet all his old cus-
tomers and as many new ones as will honor him
with their patronage. He will constantly keep
on hand
**THE BEST DRY HARD WOOD, 1 ft. long
SOFT WOOD, SLABS, KINDLING
AND SAWED WOOD.**

—SOLD CHEAP AT—
Jas. Campbell's Wood Yard.

LUMBER, WOOD AND COAL DEPOT.
GO TO ANGLIN'S

For Cheap Lumber, Wood and Coal, where
you will find the largest assortment of Dry
Lumber in the city; also the largest stock of
Dry Wood and Slabs. This is the only place in
the city having three Steam Machines for sawing
Cordwood; also having the only Steam
Wood Splitting Machine in the city.

Having purchased the Lumber in the Noon &
Finner Yard we would invite an inspection of
same, as we are selling at a slight advance on
cost.

W. B. & S. ANGLIN.

WOOD! WOOD!! WOOD!!!

CAPT. JOSEPH PARSONS

Crawford, Princess Street, will receive prompt
attention. Telephone communication.

SCIENCE AND PROGRESS.

**THE GREAT TELESCOPE IN THE
LICK OBSERVATORY.**

The American Folk Lore Society at Cam-
bridge, Mass.—Edison's New Phono-
graph, After a Crucial Test, Is Reported
to Be a Success.

It is ten years since Professor Edison in-
troduced his phonograph to the public. The
original instrument, wonderful and amusing
as it was, failed, however, to fulfill the re-
quirements of the inventor, who has recently
perfected his invention and brought it nearer
to the ideal phonograph.

FIG. 1—THE NEW PHONOGRAPH.

The new phonograph, shown in the accom-
panying cuts and made from original illus-
trations in Scientific American, is about the
size of an ordinary sewing machine, and in
construction something like a very small en-
gine lathe.

A crucial test of this machine, made re-
cently at Edison's laboratory in New Jersey,
according to the journal referred to, gave
results that tended to prove the perfection of
the instrument. Perfect reproductions of
whistling, whispering, all the imperfections
of tone, the half tones and modulations even,
were faithfully reproduced. The new pho-
nograph is to be used for taking dictation,
for taking testimony in court, for reporting

FIG. 2—THE PHONOGRAPH IN COURT.

speeches, for the reproduction of vocal music,
for teaching languages, for correspondence,
for civil and military orders, for reading to
the sick in hospitals, and for various other
purposes too numerous to mention.

American Folk Lore Society.

At the recent meeting held in Cambridge,
Mass., for the purpose of organizing the
"American Folk Lore Society," rules for the
government of the society were enacted, of
which the first declares, that "the American
Folk Lore Society has for its object the study
of folk lore in general, and in particular the
collection and publication of the folk lore of
North America." The rules further provide
that the society shall consist of members who
subscribe an annual fee of \$3; that each
member shall be entitled to a copy of the
journal to be issued by the society; that an
annual meeting shall be held; and that the
affairs of the society shall be conducted by a
president and a council of fourteen members,
to be elected annually. Professor E. J.
Child, of Harvard university, was elected
president.

Prehistoric Skating.

As is well known, the art of skating is a
prehistoric one. In many parts of Europe
bones of domesticated animals have been
found which had been used as skates or as
runners of small sledges. It is of consider-
able interest to learn that similar imple-
ments are found still in use in several parts
of northern Germany. In The Journal of the
Berlin Ethnological Society sledges are de-
scribed which consist of a board resting on
the bones of a horse. But, besides this, skates
are used the runners of which consist of the
lower jaw of cattle, the curvature of the
lower side serving admirably the object of the
skate.

Do Forests Influence Rainfall?

The belief very generally exists that the
culture of forests induces an increase of rain-
fall and that their destruction diminishes it.
Mr. Henry Gannett, in Science, claims that
a satisfactory explanation of this "supposed
phenomenon" has never been offered. He
goes further, and assumes that results gained
in our own country go to show "that the in-
fluence of forests upon rainfall, from an
economic point of view, is too slight to be of
the least practical importance."

Water Power from Artesian Wells.

Many artesian wells spout water under a
heavy pressure, just as many gas wells find
the gas under a pressure of several hundred
pounds to the square inch. This water power
is used in many places in France by means of
turbine wheels, and it is probable that even
the gas pressure might in some cases also be
utilized. In very deep artesian wells the
heat of the water is also utilized.

The \$1,000,000 Telescope.

The great refracting telescope of the Lick
observatory, Mount Hamilton, Cal., has
been tested, and the verdict is that it is a suc-
cess. The size of the object glass is thirty-six
inches. It is the most powerful telescope in
the world. A magnifying power of 2,000
diameters, it is expected, can be employed on
suitable objects.

Useful Polishing Powder.

A trustworthy authority says: A very
useful polishing powder for metals and glass
is made of very finely ground glass mixed
with a small proportion of dried soda ash.

English Words.

A half-dozen English words from The Bos-
ton Journal of Education:
Twilight is between light.
Twine, twiced, or twisted.
Thread, threed, thriced, three corded.
Perspiration is invisible; sweat stands in
drops.
Strength is said to be the longest syllable
in the English language.

LUCKY BURLESQUERS.

**They Are Living Luxuriously at the Ex-
pense of Millionaire Dudes.**

New York, Feb. 8.—Two actresses are
kicking up more of a commotion in this city
than they ever did when on the stage. Fay
Templeton was the juvenile star of a small
comic opera company. She came to this city
three years ago, and was a revelation to the
beaux of the theatres. She appeared for a
season in burlesque, and then suddenly re-
turned to ostensibly private life with How-
ell Osborne, a millionaire's son, and previous-
ly an adventurer in matrimony with another
bewitching burlesquer. Fay had just freed
herself from Billy West, the negro minstrel,
by means of a divorce, while Howell's father
had bought off his former bride with \$10,000.
So the way was clear to matrimony for How-
ell and Fay, and they went to England for a
honeymoon tour and it lasted until a week
ago, when they returned to town. Creditors
of the frisky young man about town are
jumping on him with lawsuits, but that does
not prevent him and his wife from living
luxuriously in a Broadway apartment hotel.
Mrs. Fay Templeton Osborne is astounding
the promenades and the theatres with a pro-
fusion of Parisian toilets, and some of the eyes
dazzled by these fine clothes look on them with
convetuousness as well as admiration, for one
of Osborne's creditors has had his lawyer
prepare papers for an attempt to seize the
gorgeous wardrobe. This proceeding is not
taken in the hope that it will yield a finan-
cial return, perhaps, but is intended to com-
pel an exposure of Osborne's reckless extrava-
gance in buying them.

The second professional beauty now ex-
citing the metropolis is Sadie Martinot, who
was a comic opera joy to the dudes until
she suddenly departed for Europe. There
was a great deal of mystery about it at the
time. Now it is all clear. She went away
with Antonio Terry, a son and heir to
Thomas Terry, the Cuban, who left an es-
tate of \$80,000,000 about a year ago. At
that time the young man was a husband
having married Grace Secor Dalton, a niece
of William H. Secor, a New York lawyer.
Mrs. Terry began a suit for divorce six
months ago on account of the elopement
of her husband with Miss Martinot, but
subsequently withdrew it. It was said that
Terry was under engagement to wed the
actress as soon as a divorce would permit
him to do so, and that in the meantime they
went through with some sort of ceremony
which to their consciences was to stand
provisionally in lieu of formal marriage.
That is the way the relationship stands at
present. What bewilders the theatrical
social world is the exceeding splendor of
Sadie Martinot's style of life. Her ward-
robe is more costly and more showy than
that of any Astor or Vanderbilt lady, her
suddenly-established home is wondrous in
furniture and decorations, her equipages are
among the finest that roll through Fifth
avenue and Central park, and her own
beauty is so set off by these embellishments
that she is a daily afternoon wonder in the
great fashionable thoroughfare. She says she
came to New York expressly to show her-
self thus resplendent for the winter only,
and that in the spring she will return to
Paris and Vienna, in both of which cities
she has luxurious homes.

AN ADMIRABLE ADAPTATION.

**The Opinion One Has Regarding the
Lordly Guardians of the Peace.**

A Kingston policeman on duty, except
when he is talking to a superior officer, has
a lordly disdain for common affairs. As he
moves majestically about upon his beat, the
admired of all the pretty girls and maids
and the terror of street urchins and fakirs,
he wears a look which means that a man
who talks back to him is getting dangerously
near the breakers of the law. Aldermen are
no more in his eyes than ordinary citizens.
He doesn't care a fig for their good will, for
their influence does not extend to the powers
that made him; and he would as leave rap
one of them on the "nob" with his club as a
gutter tough. The question of how many
votes this man or that controls never enters
his mind, nor does he ever consider the
policy of "calling" in any politician who is
hilarious and inclined to make trouble on
the street.

His attitude, however, is not always to
be commended. He is liable to fall into the
habit of shuffling along in an absent-minded
manner, as if he was going somewhere and
was afraid of getting there too soon. Twirl-
ing his club in these moments is a favourite
method of occupying his hands, but the in-
stant his eye detects an infraction of the
ordinances he is all attention. The fakir,
with subdued voice, responds to the order
to keep moving with a remark to immigrate
where he won't have to lay in a stock of coal
for the winter. The coal driver protests
that he isn't encroaching on the sidewalk,
and smiles meekly as the medal in brass
buttons moves quickly by.

It is the hour when the ladies throng the
thoroughfares that the policeman is seen in
his best form. Then no man dare open his
clapper when the copper smiles with so
much graciousness upon those who flit gayly
by in their fine apparel.

THE PATENTS LAST YEAR.

Some of the Remarkable Things of Which
Record is Kept at Washington.

A small rubber mat, with little spikes
on which the cashier drops the silver change
and from which the customer easily picks
it.

A cheese-cutter, a swing knife by which
the grocer can, with certainty, cut ten
ounces from the cheese whenever the cus-
tomer orders half a pound.

A balloon which carries a lightning-rod
high in the air over an oil tank.

A cigar slipping machine that drops out
an all-Havana, clips the end off, and exposes
a match and a piece of sandpaper whenever
a nickel or lead blank is dropped in a slit
in the side of the machine.

An electrical boot-blackening machine, in
which a brush is rapidly revolved in a non-
rotating handle. The whirling crush brings
the shine in one-tenth the time of the old
vibratory elbow method.

A monster bicycle, with places for two
men in a basket swung below the axle, who
operate the machine with levers geared to
the axle.

A decoy duck with a variety of detachable
heads.

An air-pump to force oil from a tank on a
ship over a stormy sea.

A fan rotated by the wheels of a baby car-
riage to keep the flies off the baby.

A church pew that looks like a pew, but
has comfortable armchairs within.

A device which will prevent the most
reckless individual from kicking the clothes
off the bed. It is the invention of a Chicago
woman.

A combined rocking-chair and cradle (in-
describable).

A combined kitchen-ventilator and clock-
winder.

How To Gain Flesh and Strength.

Use after each meal Scott's Emulsion; it
is as palatable as milk. Delicate people
improve rapidly upon its use. For con-
sumption, throat affections and bronchitis it
is unequalled. Dr. Thos. Prim, Ala., says:
"I used Scott's Emulsion on a child eight
months old; he gained four pounds in a
month." Put up in 50c and \$1 size.

ANOTHER GRAND CHANCE FOR LADIES

—AT—
Our Great Remnant Sale
—OF—
BOOTS & SHOES.

We have brought from our Reserve Stock of Belleville ANOTHER
LOT OF FINE KID BOOTS which we have placed on the Rem-
nant Table at Prices Greatly Below the Actual Value.
