WHEREAS it has been found inconvenient in practice to receive the British Silver Money at a fixed rate of Exchange, by which a fluctuating Premium has existed on those Coins, thereby keeping them out of circulation, by the advantage offered in collecting them to Exchange for Government Bills; Notice is hereby given, that from and after the 30th November, 1832, those Coins denominated British Silver Money, at those Rates where they are current by law, will be received in common with other specie at the fluctuating Exchange of the day. (Signed) R. I. ROUTH, C. G.

NOTICE. THE public are hereby informed that the Subscriber will pay no debts that are contracted on his account without a written order being produced. WILLIAM PARKS. Kingston, August 31st, 1832.

GOOD NEWS TO THE AFFLICTED

IN KINGSTON AND ITS VICINITY. Health secured by "Morrison's Vegetable Universal Medicines" only. MR. SIFTON, Hygienist from the British College of Health, London, begs to acquaint the Inhabitants of Upper and Lower Canada that he is the sole general Agent for the sale of these Medicines in both provinces, and intends to appoint numerous Agents in this district as soon as possible. Mr. Sifton regrets that he could not attend to this sooner, but the great call for the Medicines at Quebec and Montreal and the great success in curing numerous diseases, prevented his doing so, and caused nearly the whole of the Medical Faculty to be laid upon the shelf with scarcely anything to do, and during their repose in that situation it is supposed they connected a letter which appeared in the Canadian Courant on the 18th day of August last and in answer there to the following: With a Certificate signed by several Inhabitants of the city of Montreal who had been cured of Driven's disease, was the reply.—

"To the Editor of the Canadian Courant. "Montreal 21st August, 1832. "Sir,—In consequence of a paragraph which appeared in your paper of the 18th instant, I have taken the following in reply. The paragraph alluded to is underigned G and the author commences it by stating his surprise that the lives of his fellow citizens are allowed to be trifled with by a stranger (from this statement I should say he has a very poor opinion of the competency of the Inhabitants judging for themselves) but it is presumed the accompanying voluntary attestations to the good effects of the Medicines from respectable Inhabitants of this city will have a greater effect on the public mind than any statement which may be made by anonymous scribblers who are totally ignorant of the subject they have presumed to discuss, and the high estimation in which those Medicines are held and the great and increasing demand for them throughout Great Britain, West India, are it is presumed the strongest proofs of their beneficial influence and peculiar efficacy in the cure of almost every disease incident to the human frame. There is one case in particular (the name I have no permission to publish) a gentleman of the medical Profession who was attended by several of the Faculty (I believe four in number) and left by them almost dead with the fall impression that 4 or 5 hours would be the most he could live. The Family as the last resort gave him Morrison's Pills and to their utter astonishment and delight in a few days he was able to get out of the house and now walks about the streets of this city apparently without pain or inconvenience. Should any respectable person think proper to apply for the name of the gentleman above referred to it will be immediately given. I beg to apologize for troubling you so at great length but the importance of the subject to the public at this time of unusual sickness in Ireland, the United States, and the West Indies, are it is presumed the strongest proofs of their beneficial influence and peculiar efficacy in the cure of almost every disease incident to the human frame. I beg to apologize for troubling you so at great length but the importance of the subject to the public at this time of unusual sickness in Ireland, the United States, and the West Indies, are it is presumed the strongest proofs of their beneficial influence and peculiar efficacy in the cure of almost every disease incident to the human frame. There is one case in particular (the name I have no permission to publish) a gentleman of the medical Profession who was attended by several of the Faculty (I believe four in number) and left by them almost dead with the fall impression that 4 or 5 hours would be the most he could live. The Family as the last resort gave him Morrison's Pills and to their utter astonishment and delight in a few days he was able to get out of the house and now walks about the streets of this city apparently without pain or inconvenience. Should any respectable person think proper to apply for the name of the gentleman above referred to it will be immediately given.
