Sin,—I have by accident, this day, met one of your papers containing an erroneous report of my conviction of dames and Edward Leader, for an aggravated trespass by them committed on Edward McConnell, for which I fined each of the delinquents 5s. and the legal costs, to be paid in three days, (to give time for an appeal) or in default of payment, to be committed twenty days in the Midland District Gaol.

In five or six days after, old Leader not appealing, which he said he would do, and refusing to pay; I of course committed them according to conviction, and on the following testimony.

Edward McConnell, the complainant, made oath, that James and Edward Leader came to his house, killed several chickens, broke a tin dish, and the bottom out of a tin sish, and nearly killed his dog.

dish, and the bettom out of a tin dish, and nearly killed his dog.

Isaac Smith made oath, that James Leader was in Edward McConneil's premises, that he saw him shrow a stone towards McConnell's door, which broke a tin pan, and that he threw another stone by McConneil's house, which killed a chicken; witness told him not to throw so close to the house, in reply to which, James Leader told him he did not care whether he killed McConneil's children or not, and that Edward Leader told him he did not care whether he killed McConnell's chifdren or not, and that Edward Leader was with James Leader at this time. It also appeared that McConnell went to old Leader, and told him that if he would pay the damage his sons had done, and old him that if he would pay the damage his sons had done, and old statise them for doing it, the matter might drep, but, instead of doing so he abused him.

With regard to the charge of my sending a poor man to Gaol for not training, the man being travelling from Montreal on training day, it is all nonsense, as I was only President of a court artial appointed to try militial delinquents, and was obliged to comply with the decision of a majority. I should not have noticed the erroneous report of the case in the Herald, were it not that my silence might be considered an acknowledgment of its accuracy; I therefore trust you will give publicity to the foregoing correct report.

Not long ment like sheep without a shepherd. Not long since I met with an old acquaintance, a very intelligent man on whose word I could implicitly rely, who is teaching a school in the Township of Marysburgh in the Prince Edward District, who informed me that in every school District in which he had been in that section of the country, division had taken along and two schools were which he had been in that section of the country, a division had taken place, and two schools were established in many of those neighborhoods in which only one formerly existed, decidedly and rancorously opposed to each other. The same has taken place, as I am, very credibly, informed, in the Townships of Kingston, Ernest Town and Fredericksburgh. And the consequence is that many neighborhoods are now suffering for the want of schools. I pledge myself, Sir, for the truth of what I state.

In perusing the proceedings of the Municipal Council of the District of Brock published in the In perusing the proceedings of the Municipal Council of the District of Brock published in the Woodstock Hera'd of the 11th August, Mr. Nellis, one of the members made "a motion for leave to bring in a By-Law for the appropriation of £30 to lay out on the repair of that part of the Governor's road between the bridge across the Thames to the western extremity of Sheriff Carrall's farm. Mr. Carrall being willing to guarantee an equal sum for the same purpose. Mr. Van Notman strongly opposed the motion on the ground that there was no money, and indignantly adverted to the mal-appropriation of the taxes raised for public improvements, to the payment of school masters and school mistresses. He reminded the Council of his laving forewarned them of the dilemma in which this illegal appropriation of the public money would place them. Mr. Van Norman denied that there had been any such mal-appropriation. He was Chairman of the Finance Committee which had recommended the mode of raising the necessary tax. A calculation had been made which embraced the £550 to be raised to meet the Government. A calculation had been made which embraced the £550 to be raised to meet the Government grant, and which, though not specified as a school tax, was always understood to be such. The reasone to their so receiving the Government grant, the tax thus lovied might be applied to other public purposes." The real inference to be drawn, Sir, from these discussions, is that the Teachers in that District do not receive any of the public money: and the consequence, in all the public money; and the consequence, in all probability, is that few or no schools are in op-
