## OF THE Review of Legislation & Jurisprudence

Editors: - M. M. Louis G. Le Tourneux, Montreal, and Joseph U. Beaudry, Quebec.

FOR Years past, the want of a publication of the nature of the one we now propose to establish, has been deeply felt in this part of the Province of Canada. It must be admitted that of late especially, the Laws and the Jurisprudence of the country, have been and are still in such a state of uncertainty that our project must be favorably received. Amidst the confusion of Ancient and New Laws, the advected locks in variety state of uncertainty that our project must be favorably received. Amidst the confusion of Ancient and New Laws, the advocate looks in vain for those rules which should guide him in the examination of the questions which are submitted to his researches. He wanders in the Labyrinth of Statutes and Ordinances, which the Legislature multiplies each year around him.—He might find in reports of cases decided in the various tribunals of the Province some clue to guide him through his numberless difficulties. But there are no Reports published. The proposed Review will be established to supply the deficiency.

deficiency.

The publication of faithful and correct Reports of the cases argued and decided in the Courts of Lower Canada, should be a sure mode of giving to our Jurisprudence that character of stability and uniformity which it would be of so much im-

bench and the Bar.

We also beg to lay no ill founded claim to the patronage and encouragement of the Canadian public. We trust that they will appreciate the

public. We trust that they will appreciate the value of a work of general and practical utility, which may be productive of the most advantageous results, if favorably received.

The "Review of Legislation and Jurisprudence" will appear in Monthly Numbers of 48 pages, 8vo., printed on the best paper and with the greatest typographical care. It might so happen that some numbers will have more and others less than that number of pages, but the Proprietor engages to give during the year 12 rumbers, containing between 5 and 600 pages of matter.

Articles written in either language will be in-discrimately admitted in the Review.

The subscription will be six dollars per annum payable after the publication of the first number. All letters, communications &c. to be addressed (post paid) at the office of the Review, No. 31. St. Gabriel Street, opposite the Canada Hotel N. B .- The first number will appear on 1st of

LETTER OF SUFFORT.

To Louis O. Le Tourneux Eleq. Advocate— Sir, we hail with satisfaction your project of es-tablishing a Review of Legislation and Jurispru-dence, and approve of it on all accounts. It is a good and useful enterprise which will meet we good and useful enterprise which will meet we trust with all the encouragement it deserves, not only at the hands of the members of the profession, but also from the public in general. As much as our time will allow, you can depend on our contributions as well as our warmest sympathies. We are sir, with consideration your professional brethren.

HENRY SMITH, Junior,

JOHN MACDONALD.

Kingston, 12th October, 1845.

THE preceding figure is given to represent the INSENSIBLE PERSPIRATION.—
It is the great EVACUATION for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the surface, which indicates that this perspiration flows uninterruptedly when we are in health, but ceases when we are sick. Life cannot be sustained without it. It is thrown off from the blood and other juices of the body, and disposes by this means, of nearly all the impurities within as to our Jurisprudence that character of stability and uniformity which it would be of so much importance to impart to it; at the same time, a publication, the columns of which will be open to the discussion of questions of Legislation, Law and Practice, must be of great interest not only to Members of the Profession, but also to all Men of Business.

We have been urged to publish this Review by a large number of our Professional Brethren; we thank them for the sympathy they have already displayed towards us at the commencement of a task as serious and difficult as the one we are about to undertake. But to render the proposed work interesting and useful, they must understand that we cannot alone bear the burden of it. In a community like ours, a periodical like this can never succeed without the combined efforts of the different Members of the Bar; they owe us one and all their contributions to a work aiming at the general good.

From the high functionaries who are called upon to administer Justice, and whose decisions we shall have to report, we ask patronage and includence. Our labours will be conjucted with deliberation, with accuracy and with impartiality. They will always have for one of their principal objects the maintainance of those good feelings which should nover cease to exist between the bench and the Bar.

We also beg to lay no ill founded claim to the the INSENSIBLE PERSPIRATION. Thus we see, all that is necessary when the blood is stagnant, or infected, is to open the pores, and it relieves itself from all impurity instantly.—
Thus we see the folly of taking so much internal remedies. All practitioners, however, direct their efforts to restore the Insensible Perspiration, but it seems to be not always the proper one. The Thomsonian, for instance, steams, the Hydropathist shrouds us in wet blankets, the Homopathist deals out infinitissimals, the Allopathist bleeds and does us with mercury, and the blustering Quack gorges us with pills, pills, pills,

this upon the surface, where the clogging actually is? Would not this be common sense?—And yet I know of no physician who makes any external application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of floing it. Under these circumstances, I present to physicians, and to all others, a preparation that has this power in its fullest extent. It is McAlister's All-Healing Ointment, or the World's Salve. It has POWER to restore perspiration on the feet, on the head, around old sores, upon the chest, in short, upon any part of the body, whether diseased slightly any part of the body, whether diseased slightly

It has POWER to cause all external scres, scrofulous humors, skin diseases, poisonous wounds, to discharge their putrid matter, and then heals them.

WORMS.

If parents knew how fatal most medicines were to children taken inwardly, they would be slow to resort to them. Especially "mercurial lozengers," called "medicated lozenges," "vermifuges," pills, &c. Even were it possible to say positively that worms were present, it is not safe. The truth is, no one can tell invariably when worms are present. Of course the remedy is not applicable to the complaint. Now lat me say to parents, that this salve will always tell if a child has worms. Let it be rubbed on the neck and chest, to keep them from going up, and then down on the bowels, and they will soon leave. It will DRIVE every vestige of them away. This is a simple and SAFE cure. No injury can come of it any way. But should it be cholic, inflammation of the bowels, or gripe of the intestines, it will effectually cure them as the worms.

If such sores are healed up, the impurities must have some other outlet, or it will endanger life. This is the reason why it is impolitic to use the common salves of the day in such cases. For they have no power to cappe other avenues, to let off all this power to open other avenues, to let off all this morbid matter, and the consequences are always fatal. This salve will always provide for such emergencies. There need be no fear; it is per-

In other words, if we cat and drink eight pounds per day, we evacuated five pounds of it by the Insensible Perspiration.

This is none other than the used up particles of the blood, and other juices, giving place to the new and fresh ones. To check this, thorefore, is to retain in the system five-eighths of all leave the body. And even when this is the case, the blood is of so active a principle, that it determines those particles to the akin, where they form scabs, pimples, ulcers, and other spots.
