POISONOUS EFFECTS OF GUANO. BY CHARLES KIDP, M. D.

The immense interest attached of late to com The immense interest attached of late to compounds of ammonia in the agricultural world, especially guano, the chief of the nitregen suppliers, has led me to the conviction that the particulars of the very singular case appended, which occurred within the last month, may not be unattended with good effects, in directing the attention of the profession to a subject at present, perhaps, quite unsuspected, or lead to the observance of more general caution in using this very active agent; the case itself, perhaps, will form the best introduction to the subject.

On Thursday, June 19, I was called to see J. H., a farmer, some three miles from Limerick.

On Thursday, June 19, I was called to see J. H., a farmer, some three miles from Limerick, who, I was informed, had been for the previous 43 hours throwing up blood, and who was now in articulo mortis. On arriving at the house, I found him with a large vessel full of dark venous blood, mixed with mucus and saliva, between his feet, while in the intermission of the deepest prostration he ineffectually attempted to clear the back of the fauces of a thick, tenacious, bloody mucus, the greater past heavy nurses are

the back of the fauces of a thick, tenacious, bloody mucus, the greater part being pure venous blood, of which he had thrown up about four large pailfuls. Struck with the singularity of the matter, I at once questioned the attendants, when I obtained the following history:—

He had been to town a week previous for some bags of guano; in his anxiety to get away home, he assisted in filling the bags, and while doing so held the corner of each of the bags in his mouth. The guano was very dry, and he felt some of the dust going down his throat—in his own expressive phraseology, "he felt the fumes and dust of it burning him internally." Returning at night, he complained of his throat; his tongue became painfully swelled, and his lips and mouth excessively sore; he made little of k, thinking it would wear away, but hemorrhage soon after setting in, he got frightened; by some M, thinking it would wear away, but hemorrhage soon after setting in, he got frightened; by some mismanagement, however, even then no assistance was obtained and up to the present moment he had done nothing.

sgain, a gradual exudation of blood took place from some deep source, which we were unable to detect; the sub-maxillary and sub-lingual glands were somewhat swollen and painful, the swefling to the anterior part of the next, as low as the thyroid cartilage; and, added to these appearances, the poor fellow was troubled with an irritative cough, produced every five minutes by the blood exuding somewhere about the rima glottidis, if not lower down. Imagining the possibility of something wrong within the chest, I ran the stethoscope over it, but everything seemed quite normal, with the exception of the heart, which plainly betrayed evidences of the drain on the vascular system; the pulse was similarly characterized, being small and particularly weak. the vascular system; the pulse was similarly characterized, being small and particularly weak.

Symptoms of the blood beginning to make its way into the stomach were becoming apparent since morning, as he complained of nausea with tendency to vomit, head ache and general uneasiness; his bowels also had been effected, the dejections being quite black and grumous; he had lost all appetite or wish for any thing eatable, and had subsisted for the last three days on some acidulated drink; and to complete the sad list of the pour fellow's sufferings, he had not slept for three nights, from fear of suffection.

From the great necessity which existed to do something at once, I thought first to use pressure on some of the branches of the carotid, or on the vessel itself; the hemorrhage being manifestly venous, it had no effect. In the meantime I ordered a strong astringent gargle, with alum and creosote, and an acidulous aperient mixture. (Inf. roses, sulph. magnesize et acid. sulph dif.) After using the gargle four or five times, the hemorrhage manifestly abated to a certain extent. certain extent.

times, the hemorrhage manifestly abated to a certain extent.

The peculiar saline exudation, attended with cough, (from the rima, or possibly ventricles of the larynx,) was more troublesome, if possible, so that when flattering himself that the worst was over, more than once an irresistible effort to cough, brought back the hemorrhage again. The medicine also had a very good effect, and brought away large quantities of blood, acted on by the acids of the alimentary canal. The creesote seemed to act very efficiently, but the cough was incessant, as likewise the renewal of the hemorrhage. I was anxious to try opium; from the great tendency, however, which he evinced for sleep, which he resisted, fearing suffocation, I was induced to lay it aside.

was induced to lay it aside.

20.—He was seen to-day by several persons; ever and anon, as the ticking and the cough abated, the hemorrhage diminished. But no combination of astringents that we could devise seemed to have the least effect on the blood scener, from the vicinity of the glottles county. coming from the vicinity of the glottis; cough most distressing and constant, at the same time that every thing within the thorax appears quite

natural.

21. Manifestly worse to-day; hemorrhage uninterrupted. Toward evening the poor fellow
showed some sign of amendment; soon after,
however, the pulse became gradually less perceptible; the blood collected in great quantities
in the fauces, all assistance became unavailing,
and he sank from complete exhaustion. After
death, the blood continued to awards for executwas of a veneus character.

I was pariicularly anxious for a necroscopic

NEW WIND WILL.—A correspondent sends us an account of a wind-mill, lately invented and put in operation at Cabotville, by Dr. J. B. Bridgeman and Allan Judd of that village. In approaching the building in which the mill is erected, nothing could be seen of the wheel kind, but on going up into the second story, our informant discovered it directly over his head, turning round like a top. The sides of the wheel are open, partly by an arrangement of buckets or floats; they are set at such an angle with the shaft that when a strong current of air draws through, there is a strong pressure on each float. The current of air enters on one side of the building, below the wheel, and passes out on the opposite side, higher up. The gate is hoisted by a similar arrangement to that of the moveable blind. The inlet of air is twice as great as the outlet; so there is a strong pressure of agreed as the outlet; so there is a strong pressure of agreed as the outlet; so there is a strong pressure of agreed as the outlet; so there is a strong pressure of agreed as the outlet; so there is a strong pressure of agreed as the outlet; so there is a strong pressure of the ground the most useful as twell as the cheapest family medicine in the well as the cheapest family here deal that the cheapest family medicine in the well as the cheapest family as great as the outlet; so there is a strong pressure on every bucket of the wheel, which rewith a steady, strong and beautiful motion. The wheel is fourteen feet in diameter and about seven in height. Such a wheel is capable of driving a circular saw, lathe, or any-thing where a small power is required. On a large farm it would, properly arranged, drive the thrashing machine and cleaning-mill, do the churning, and best of all, turn the grind-stone.

[Springfield (Mass) Republican. -[Springfield (Mass) Republican-

AN AWKWARD MISTAKE .- An Antwerp jour-An Awkward Mistare.—An Antwerp journalist states, that he sent a reporter to Brussels for the "king's speech," and with him a couple of earrier-pigcons to bear back the decument.—At Brussels he gave the pigeons in charge to a waiter, and called for breakfast. He was kept waiting for some time, but a delicious fricassee aboued for the delay. After breakfast, he paid his bill, and called for his pigeons. "Pigeons!" ejaculated the waiter; "you have eaten them!" Spinal Complaints.

For Burns it has not its equal in the world!

Persons who are always cheerful and good are very useful in the world: an atmosphere of peace and happines

Sureice By an Indian.—An old Indian, near Galt, last week deliberately prepared bank from a tree to make a noose for his neck, and having adjusted it to a branch of the tree, leaped from these and was found having perfectly dead seignsted it to a branch of the tice, leaped from any matter that may be lodged under the skin, and matter that may be lodged under the skin, and frequently breaking out to the surface. It then heals. When there is nothing but grossness, or

THE preceding figure is given to represent the INSENSIBLE PERSPIRATION.-It is the great EVACUATION for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the surface, which indicates that this perspiration flows uninterruptedly when we are in health, but ceases when we are sick. Life cannot be sustained without it. It is thrown off from the blood and other juices of the body, and disposes by this menne, of nearly all the impurities within us. means, of nearly all the impurities within us.—
The language of Scripture is, "in the BLOOD is the Life." If it ever becomes impure, it may be traced directly to the stoppage of the INSEN-SIBLE PERSPIRATION. It never requires any internal medicines to cleanse it, as it AL-WAYS purifies itself by its own heat and action, and throws off all the offending humors, through and throws off all the offending humors, through the INSENSIBLE PERSPIRATION. Thus we see, all that is necessary when the blood is stagnant, or infected, is to open the pores, and ance was obtained, and up to the present moment he had done nothing.

On examining the parts, I found the lips and gums exceedingly red and sore, the tongue very much swollen, so as to present a considerable obstacle to an examination of the parts about its base; the posterior fauces also appeared red and swollen, and on examining them over and over again, a gradual exudation of blood took place from some deen source, which we were nealed.

the virulent matter that nature demands should leave the body. And even when this is the case, the blood is of so active a principle, that it de-termines those particles to the skin, where they

form scabs, pimples, ulcers, and other spots.

By a sudden transition from heat to cold, the pores are stopped, the perspiration ceases, and disease begins at once to develope itself. Hence,

a stoppage of the flow of the juices, originates so many complaints.

It is by stopping the pores, that overwhelms mankind with coughs, colds, and consumptions. Nine-tenths of the world die from diseases induced by a stoppage of the INSENSIBLE PERSPIRATION.

Detailed by a stoppage of the INSENSIBLE PERSPIRATION.

Let me ask now, every candid mind, what course seems the most reasonable to pursue, to unstop the pores, after they are closed—
Would you give physic to UNSTOP the pores? Or would you apply something that would do this upon the surface, where the clogging actually is? Would not this be common sense?—And yet I know of no physician who makes any external application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of doing it. Under these circumstances, I present to physicians, and to all others, a preparation that has this power in its fullest extent. It is McAlister's All-Healing Ointment, or the World's Salve. It has POWER to restore perspiration on the feet, on the head, to restore perspiration on the feet, on the head, around old sores, upon the chest, in short, upon any part of the body, whether diseased slightly

severely.
It has POWER to cause all external sores. scrofulous humors, skin diseases, poisonous wounds, to discharge their putrid matter, and then heals them.
It is a REMEDY that sweeps off the whole

It is a REMEDY that neither sickens, gives convenience, nor is dangerous to the intes

It preserves & defends the surface from all de-It preserves & detends the surface in the preserves at the channels for the blood to void all its impurities and dispose of all its useless particles. There the channels for the blood to void an its and dispose of all its useless particles. There is a connection, harmony, and feasibility in it all that defies contradiction. It is a simple, but wonderful principle that preserves in healthy operations the entire machinery of our being. It wonderful principle that preserves in healthy of the contents—a rather singular confirmation of an opinion I had formed, that the hemorrhage I was parificularly apprious.

Wonderful principle that preserves in healthy of eration the entire machinery of our being. It indissolubly holds together the SURFACE and the INTERNAL VISCERA, the INTERNAL VISCERA and the SURFACE. They are inseparably connected and cannot be disjoined. The surface is THE was of a veneus character.

I was pariicularly anxious for a necroscopic view of the organs implicated, but the friends of the deceased would not permit it.

New Wind Will.—A correspondent sends NEW WIND WILL.—A correspondent sends an account of a wind-mill, lately invented not benefit. It will be found the most useful as

HEAD ACHE.

Consumption, Liver complaint, pains in the chest or side, falling of the hair, one or the other always accompanies cold feet. It is a sure sign of disease in the system to have cold feet.

The salve will restore the Insensible Perspir-

For Burns it has not its equal in the world ! And for Chest Diseases, such as Asthma, oppressive Pains, and the like, there is no internal remedy comparable to it. PIMPLES ON THE FACE, MASCULINE

Its first action is to expell all humor. It will

dull repulsive surface, it begins to soften and soften until the skin becomes licate as a child's. WORMS.

licate as a child's.

WORMS.

If parents knew how fatal most medicines were to children taken inwardly, they would be slow to resort to them. Especially "mercurial lezengers," called "medicated lozenges," "vermifuges," pille, &c. Even were it possible to say positively that worus were present, it is not safe. The truth is, no one can tell invariably when worms are present. Of course the remedy is not applicable to the complaint. Now let me say to parents, that this salve will always tell if a child has worms. Let it be rubbed on the neck and chest, to keep them from going up, and then down on the bowels, and they will soon leave. It will DRIVE every vestige of them away. This is a simple and SAFE cure. No injury can come of it any way. But should it be cholic, infammation of the bowels, or gripe of the intestines, it will effectually cure them as the worms. worms.
There is probably no medicine on the face of

the earth at once so sure and so safe in the ex pulsion of worms.

It would be cruel, nay WICKED, to give internal doubtful medicines, so long as a harmless, certain, and effectual external one could be had.

TOILET.
I have it done up in fine order for the dressing case. Although I have said little about it, as a hair restorative, I will stake it against the world. They may bring their oils far and near, and mine will restorate the said transfer of the said transfer They may bring their oils far and near, and mine will restore the hair two cases to their one. That some sores are an outlet to the impurities of the system, is the only reason, because they cannot pass off through the natural channels of the Insensible Perspiration. If such sores are healed up, the impurities must have some other outlet, or it will endanger life. This is the reason why it is impolitic to use the common salves of the day in such cases. For they have no power to open other avenues, to let off all this power to open other avenues, to let off all this morbid matter, and the consequences are always fatal. This salve will always provide for such emergencies. There need be no fear; it is per

Diseases of Children. If the ALL-HEALING OINTMENT po sessed no other virtue than merely to cure the various diseases with which children are afflict-

ed, we should esteem it the first medicine in exed, we should esteem it the first medicine in existence. How great are the sufferings of infants and children, when they can neither state their wants nor point out their pains? And how many thousands are swept off by giving internal medicines, when their young bodies and tender frames are unable to bear up against them? Whole armies are thus sent to their graves merely from mies are thus sent to their graves merely from pouring into their weak stomachs powerful drug and physics!! It is to such that the All-Healing and physics!! It is to such that the All-Healing Ointment tenders so safe, pleasant, and harmless a cure in their suffering and sickness. Few, nay, perhaps not more than three or four in a thousand would die; while nearly all would be instantly relieved of their pains and infirmities. Such cases as Croup, Cholic, Cholera Infantum, Worms, and all Summer Complaints, by which so many children die, the Ointment will remove so speedily and surely, that a physician will never be needed. We would here press upon mothers the reality of these things. We speak earnestly, because we feel it would be wicked net to use those means which would remove earnestly, because we feel it would be wicked not to use those means which would remove their suffering, while it did not endanger their lives, or the strength and vigor of their young constitutions. Mothers! throughout all this land, we now solemaly and searedly declare to you that the All-Healing Ointment will save your children from an early grave if you will use it; and we therefore make this appeal in their behalf that the final responsibility may be your own, if they die prenaturely. Aside from every interest to ourselves, we charge you to take heed to what we now tell you. We are not now actuated by the least desire of gain; but knowing as we do that was bodies of infants and children die early, which is supposed to be inevitadren die early, which is supposed to be inevita-ble and impossible to prevent, we hold up our warning voice, and declare in the face of the whole world, Children need not die more than others.

But it is from the want of proper nourishment and the constant drugging they underge, which mows them down as the rank grass falls before the scythe.

Mothers! we repeat again, and if they were he last words we were ever to utter, and of course past the reach of all interest, we would say "Use the ALL-HEALING OINTMENT for

sickness among children."

RHEUMATISM.—It removes almost immediate ly the inflammation and swelling, when the pair

of course ceases.

FEMALE COMPLAINTS.—Its glory and power i manifest in no way more than in this department. Inflammation of the *kidneys*, of the *womb*, and its falling down, weakness, and irregularity; in short, all those difficulties which are frequent

short, all those difficulties which are frequent with females, find ready and permanent relief.

Scald Heads.—We have cured cases that actually defied everything known, as well as the ability of fifteen or twenty doctors. One man told us he had spent \$500 on his children, without any benefit, when a few boxes of the ointment cured them.

Conns.—People need never be troubled with them if they will use it.

As a Family Medicine, no man can measure its value. So long as the stars roll along over the heavens—so long as man treads the earth, subject to all the infirmities of the flesh—so long as discase and sickness are known—just so long will this good ointment be used and esteemed. When man ceases from off the earth, then the demand will cease, and not till then. demand will cease, and not till then.

JAMES McALISTER & Co.,

Sole proprietors of the above Medicine, to whom all communications must be addressed (post paid.)

Price, 25 cents and 50 cents.

CAUTION.

As the All-Healing Onliment has been greatly counterfeited, we have given this caution to the public, that "no ointment will be genuine unless the names of James McAlister, or James McAlister & Co., are written with a pen upon every label." The label is a steel engraving, with the figure of "Insensible Perspiration" on the face:

THE MOTHER AND

A DOMESTIC DREAM Twas dear, indeed, to watch
The mother and the child;
And note their gentle playful
And then her chidings mile
And how she oft would kiss
With mad and fond delight
And press him closely to her And press him closely to her That blue eyed little sprite

And how he'd softly pat her

And how he'd softly par her And kiss it o'er and o'er;
While she, that fair young n
What bliss would she have
With a sweet pledge of wede
A link within that chain, Which binds two willing son In hope and joy the same! h! it's a cheerful sight, I w To see two thus at play— the mother and her cherub With hearts so light and g

We all have known a mothe We all have felt her kiss; and, in our young and tende What brighter dream than h! then there's something In word, and look, and sm dreamy softness lights her That touches us the while and we half sigh to share he Though sigh we may in va ntil our hearts are link'd lik Within affection's chain.
