The committee of management, have to report that since the last annual meeting, with the view of the better accommodation of the Members, it was deemed expedient to hire rooms for the meeting of the Society over the Shop of Mr. Armstrong in the Market Square—which they found to be tolerably convenient; unavoidable tircumstances occurring with respect to Mr. Armstrong's affairs, rendered a removal necessary—they therefore after some search and deliberation concluded to return to the old place of meeting as being on the whole most central, and have succeeded in obtaining additional rooms, at a slight advance of Rent, where the Members are much better situated than before. With the Parliamentary grant they have made valuable additions to the Library, and procured a pair of Globes, in the use of which Lectures were given through the kindness of Mr. McGregor, to the Members and others who were invited—they have ordered a chemical apparatus, which is not yet arrived, to pay for which a reservation has been specially made from the Parliamentary grant so that the annual funds are applicable towards the Rent and for the Contingent expences of the Institution—since the last report the Institution has been steadily upheld, there has indeed been no great addition to the number of the Members, but such as continue, feel warmly interested in its future prosperity; which they trust will be ensured by its advantages to the Mechanic becoming better known and more fully appreciated. All of which is respectfully submitted.

FORWARDING ON THE ST. LAWRENCE, AND ON THE

OTTAWA AND RIDEAU CANAL.

WITH a view to afford choice of rout of Transport, the Subscribers have entered into permanent arrangements with the Ottawa and Rideau Company for the towing of their Barges on the Ottawa & Rideau Communication. Their Barges (now being built,) will be of a superior description, of about 100 Tons burdlen, deckedas securely, and as substantially, as the best of the Schooners on Lake Ontario, and otherwise peculiarly adapted to the trade of that Communication;

—By this arrangement they will be enabled to test fairly, the merits of both routes, and of course adopting the one for the major part of their business that may most conduce to the attainment of the two great objects of the Trade, namely safety and despatch.

Their means of transport will be considerably more than adequate to the amount of business that they can have a right to expect, say about 2000 Tons per week Downword, & Upward something more th n half that quantity. Their extensive Warehousing Establishments at this place and at Montreal as well known to the public; at Kingston they vill occupy the premises of J. S. Cartwight, Isq.

In offeing to their Friends and the public these increased facilities, which in connection with their experience and general knowledge of the business they cannot but flatter themselves with the expertation of a patronage more than commensurate to the outlay incurred in making such an addition to their Establishment.

With regard to goods upward bound and crossing the Lakes, they beg to remark, that they do not only interest they can have in goods after their arrival at Prescott or Kingston is identified with that of the owner, namely, to have them immediately and safely shipped out of their Stores, with the desire as mendenced. OTTAWA AND RIDEAU CANAL.

amgston is identified with that of the owner, namely, to have them immediately and safely shipped out of their Stores, with the desire as men depending on their customers for business, that they may have safe and speedy passage, and in that way establishing their claim to future favours

that way establishing their craim to have and support.

They propose making themselves useful to their Customers as agents in procuring vessels for the carrying of Staves and other property across the Lakes, and from their general acquaintance with Schooner owners and masters, they have no doubt of being able to effect arrangements of this sort, more advantageously to owners of produce, than they themselves could do.
