From the American Weekly Messenger DEAR SIE,—As the diseases of cattle are fewer than those of horses, I think one letter on the subject will be all I shall trouble your readers to peruse. The time is also drawing nigh when old Boreas will submit to the influence of Sol, and the vegetable kingdom will again burst forth in all the heart cheering beauties of spring. I will then discourse of tilling the earth, of seeds, of fruits and of flowers: then I hope to attract the attention of of flowers; then I hope to attract the attention of

of flowers; there is the ladies.

Murian is a disease said by the books to be contagious. This I consider a false theory, and take the authors themselves to prove it. They state correctly that it is caused by the animal eating poisonous weeds, such as hellibore, johnswart, jimpson weed, larkspur, &c., and drinking muddy, themant water.

stagnant water.

As a matter of course, the cause being poison, confined in plants and water, and not in the atmosphere, the disease cannot be contagious. With the same propriety I might assume the theory, that if my neighbour commits suicide by taking arsenic, or by blowing out the few shallow brains he has in his cranium, therefore, suicide is contagious. I believe it to be more so than murrian, for monkeys and fools are remarkable for imitation, and cattle are not apt to eat poisonous vegetables only in time of a drought, when food becomes very scarce. This disease may be known by the animal hanging down its head, which becomes swollen, short breathing, palpitation of the heart, staggering, secretion of viscid matter in the eyes, ratling in the throat, tongue dry and shining, &c.

Cure.—Give a cow or ox one spoonful of onion juice, one of soot, one of sulphur, four of sait, and a tea-spoonful of saltpetre, mixed in half a pint of warm water; add half a pint of spirits, and pour it down with a bottle or horn. The inst-day give this quantity morning and evening. Let the drink be warm gruel, with about half a gallon of tar water, in the course of the day; keep the animal warm and dry, feeding with a mash of wheat bran and boiled oats, with a half pint of starch in each feed. Give the medicine once a day, until a decided improvement takes place, and then discontinue it at intervals, as the case may require. In the essence of onions, half the quantity of garlic juice is just as good. The second and fifth days give a purge.

Hoven — This arises from cat le eating greedily

In the essence of onions, half the quantity of garlic juice is just as good. The second and fifth days give a purge.

Hoven —This arises from cat le eating greedily of red clover or other vegetables containing a large share of acid and mephitic gas. These occasion a dilation of the stomach, causing the animal to swell to an enormous size in a short time. The cure is as simple as death is certain, unless the cause is speedily removed. Dissolve an cunce of potash in a quart of water, and down with it, nolens volens, half a pint at a time, once in fifteen minutes, until relief is produced. In the absence of potash, pearlash, saleratus, or fifteen drops of alkalic volatile flour will answer, given in the same quantities, will sometimes answer the purpose. A pint of sweet oil, with the same quantity of melted lard or butter, have in some instances given relief.—Beef or fresh brine is sometimes used. From the nature of the cause, alkalis are the safest remedy. This disease is quite as contagious as murrain.

Horn Distemper.—It may be known by a dullness of countenance, slow motion, a loss of appetite, shaking of the head, an apparent dexines, frequent lying down, &c. To determine with certainty if this is the disease, bore the horn with a gimblet about three inches from the head, if you get no blood, it is the horn distemper. Then bore another hole on the opposite side, inject strong vinegar and spirits of camphor, or salt and vinegar, give gentle purgatives, and give the animal good living, for the disease is usually a child of poverty. Sawing off the horns, is a practice as unnecessary as it is ridculous. Preserve the only weapon nature has bestowed to them.

TALL Sick or Wolf.—This is generally confined to young cattle in the spring, and causes a loss of appetite. The disease is readily discovered. If the wolf, the part aff eted feels spongy, the joints appearing to be separated; the cure is simple. Some cut off the tail as far up as diseased; but as this robs nature of one of her ornaments and detracts from the b

and detracts from the beauty of the animal, I prefer the following method. Slit the part affected lengthwise with a keen knife, lay in equal quantities of salt, soot, onion or gartic, well beat togsther, and bind it up with a cloth. Repeat this application on the second day, and on the fourth day pour on hot tar and tallow; a cure is certain. Scouss.—This disease takes the flesh from cattle with astonishing rapidity. It is produced by a disorganization of the stomach and functions of digestion, arising from various causes.

Cure.—To an ox give a pint of rhubart syrup.

digestion, arising from various causes.

Cure.—To an ox give a pint of rhubarb syrup, one ounce of paregoric, and a spoonful of salt, night and moraing for two days, then give him a quart of new milk after boiling comfrey in it, adding four spoonsful of rennet, feed wi'h a mash of wheat bran, give clean sweet hay, and in three days the cure is generally effected. A pint of new milk, boiled with comfrey, and two spoonsful of rennet, will generally relieve calves after a few doses, without anything else.

Yellows on Pantes.—This dise se may be

YELLOWS OR PANTEES.—This dise se may be Yellows on PANTESS.—It is called the lip, run-ning of the eyes, and a collection of yellow wax in the ears. In the treatment of this disease, obin the ears. In the treatment of this disease, observation and experience compel me to differ with the books. Many things are beautifully set forth in theory by the literati, that we clodboppers cannot consent to. Yellows, or as some call the disease, the gall, is produced by the same causes as nurrain, and I consider it the incipient stage of that disease. At all events, the best remedy is to use the same medicine, only about half the quantity. In both diseases, it is advisable to give a powerful cathartic the second and fifth days, composed of a quarter of an ounce of gum aloes, one pint of soft soap, one pint of molasses, with a little warm water, and a handful of salt.

Oxen in the spring of the year, are often heat-

Oxen in the spring of the year, are often heat-ed by hearless drivers, and ruined entirely. The consequences of over-heating are, a stoppage of free circulation, a relaxation of the solids, and a prevention of perspiration, producing general de-bifity and inaction, deranging the secretions and fluids.

CURE.—One quart of good rum or gin, with a spoonful of cayenne p pper, if given in time, and the animal permitted to rest, feeding with a mash of wheat bran and oats seasoned with salt, will often perform a cure. A man that will over-drive an ox, should himself be put in the yoke.

Mange.—This is a disease availaging sages on

an ox, should himself be put in the yoke.

Mange.—This is a disease producing sores on cattle, caused by impure blood. Give occasional doses of salts, and a spoonful of sulphur with a tea spoonful of spirits of turpentine, the sulphur and turpentine one day, and the salts the next. Wash the parts affected with soap suds, then rub on an ointment made of half a pound of lard, half a gill of spirits of turpentine, a quarter of an ounce of oil of vitriol, and one ounce of sulphur, keeping the animal under cover, if foul weather. The cure is usuadly performed in a week or ten days.

Losing the Cud or Quid.—The loss of this necessary acticle in cattle, affects them more seriously, but is not more seusibly manifested, than ween the fifthy tobacco chewer is deprived of his nauseous weed. It arises from a weakness of the muscular functions of the first stomach, produced by various causes. In common cases, take half of the quid, warm from the mouth of another cow or bullock, and put in the mouth of another cow or bullock, and put in the mouth of the one that has none. Should this not succeed, feed with a mash of wheat bran and boiled outs, adding half an ounce of pulvariand requiring the same quantity. has none. Should this not succeed, neer with a mash of wheat bran and boiled outs, adding half an ounce of pulverised gentian, the same quantity of Peruvian bark, a tea spoonful of ginger, the whole mixed, and seasoned with a little salt. In the second mash, put six drachms of aloes, the same quantity of rhubarb, half an ounce of ground antissed, and half an ounce of salt of tartar. Perul quantity of inudate, nair an ounce of ground an-nisced, and half an ounce of salt of tartar. Feed with small quantities of good hay, and in a few hours after each mash, put in the mouth a part of a quid, warm from another animal. Give warm

not so with the brute creation. Cleanliness is one of nature's laws. The best remedy is, to mix Scotch souff with train oil, and rub this composition on the top of the back and neck of the animal. It is more effectual than the Yankee flea powder, made of brick dust. Another adventage may be named. If the f-males of your household conament the handles of their faces with this precroament the handles of their faces with this precious article, you can buy it by the quantity, it
will save money. If your children are troubled
with vermin, a little of this compound will save
much time, and you will not require half the louse
traps. Thus, you will save both time and money
in your family, and economy is the philosopher's
stone of wealth.

Stone of wealth.

During winter tar should be frequently rubbed around the roots of the horns of cattle, they should have plenty of salt, and an occasional feed of round potatoes. Regular feed promotes health.

INFLAMED UDDERS.—Many a fine cow is rendered useless for milk, for want of proper treatment in this particular. I find nothing in the books equal to the following remedy. Take half a pint of sweet oi', one ounce of laudanum, one ounce of hartshorn, and half a pint of brandy; mix them through; bathe freely with this twice a day, warming it in a hot shovel, or, what is better, rub the part affected with a smooth roundish stone, as hot as you can bear it in your hand. as you can bear it in your hand. OLD BUCKS.

February 18, 1837.

"IT."—A t'p top exquisite was endeavoring to call a coach, one day, but his lungs not being very available, or having too little muscular power to blow them, or deeming it very vulgar to speak loud enough to be heard; a sailor happening to pass along and observing the difficulty, hailed coachee in a voice like a speaking trumpet;—"Here," said Jack, looking unutterable things at the dandy—"here's something that wants you,"

NEW TAILORING ESTABLISHMENT. NEW TAILORING ESTABLISHMENT.

THE SUBSCRIBER would respectfully acquaint the Inhabitants of Kingston and the vicinity, that he has just commenced the above business in the House adjoining Mr. Hatch's establishment in Store Street, where he will fulfil all orders in his line of business with neatnesss and despatch, and he solicits the pationage of the public both in Town and Country.

JOHN H. GREER.

THE VILLAGE or THOROLD occupies both sides o the mountain ridge, or summit level of the Welland Canal, 350 feet above the level of Lake Ontario, and is known to be peculiarly health. There are neither swamps nor marshes in its vicinity; and it stands in the centre of a fertile vicinity; and it stands in the centre of a fertile vicinity; and it stands in the centre of a fertile vicinity; and it stands in the centre of a fertile vicinity; and it stands in the centre of a fertile vicinity; and it stands in the centre of a fertile vicinity; and it stands in the centre of a fertile vicinity; and it stands in the centre of a fertile vicinity; and it stands in the centre of a fertile vicinity.

sides o the monutant fuge.

I sides o the monutant fuge.

I take Ontario, and is known to be peculiarly healthy. There are neither swamps nor marshes in its vicinity; and it stands in the centre of a fertile and well-cultivated wheat country, in a direct line between the City of the Falls and St. Catharines, in the Niagara District.

But 5 years can be dated from its origin, and so rapidly has it progressed, that it now contains more than 400 souls; two Churches, a School-House, Post office, several good Shops, and a Medical Establishment; an extensive Flour mill, a Brewery, and four Sawmills, with Blacksmiths', Carpenters', Shoemakers', Carrmakers', Tailors', and several other Tradesmen's establishments, are at full work. A new Carding and Fulling mill, and Grist mill, are nearly ready for work, and a great number of additional houses are nearly comgreat number of additional houses are nearly com-pleted.

There is a direct communication to Lake Ontario, and Lake Erie, by a constant succession of Schooners and Boats, affording great advantages for the conveyance of merchandize and agricultural produce to different markets. The water has a fall of forty feet, and power to an extent equal to propelling machinery for any manufacturing purpose, for which eligible mill sites can be had. A good Tannery could be worked to great advantage, bark being so easily obtained from the forests of Chippewa and the Grand River.

The Subscriber, in calling the attention of Manufacturers and Mechanics to this rising Village, offers to sell some very advantageous Lots, on moderate terms, and long credit, to actual set-There is a direct cemmunication to Lake Onta-

derate terms, and long credit, to actual settlers only. GEORGE KEEFER.

Thorold, October, 1835. THE SUBSCRIBER is now receiving and o-pening his expected stock of TO DRY GOOD MERCHANTS.

THE SUBSCRIBER begs to notify the Trade that he has received by the last Packet ship, via. New York, invoices of Thirty Bales and Cases, Manchester and Glasgow DRY GOODS,

all of which he hopes will be here on or about the GROCERIES, WINES, LIQUORS, CROCK-ERY AND GLASSWARE, 1st of June. all of which will be sold low for Cash, or approved

These goods were imported expressly to this market to be disposed of by public Auction, and as they are a selection of choice Staple Goods, buyers will find themselves well served. A farther notification will appear.

JOHN H. GREER.

Kingston, May 25th, 1837.

most modern style, 25 per cent. less than the usua September 9.

TO EMIGRANTS.

NFORMATION is wanted of JAMES MUL-LEN—a native of the parish of Ahenloe, coun-ty of Derry, Ireland. He arrived at Quebec in the year 1831, and has been residing since that time somewhere in Upper Canada. Should he see this notice, he will please communicate with his Mother and Sister, at present residing in Mon-treal, through the Office of the Morning Courier. Editors in Upper Canada will please give the above an insertion. CENTLEMEN,—I wrote a few remarks some months ago, respecting Emigration to the western parts of this Province. I have seen number of instances in which emigrants have assed Kingston, wearied themselves and families, and expended their money, and then returned hat to this part of the Province. I have sold send of them better Lands for almost half of the price they had to give in the western Districts, and TAKE NOTICE.

THE subscriber has FOR SALE 115 Acres of LAND in West Loughborough, No. 18 in the 6th Concession. Whoever wishes to purchase will please call on his agent Mr. Nicholls, who lives within 2 miles of said land.

JAMES BORLAND.

June 20th 1837. have now a large quantity of cultivated and most tivated Lands for sale; therefore, I recommet them to call and see for themselves, and not speak

their money for nothing.

Any information wanted respecting location can be had at my office in Store Street, Kingston Upper Canada. D. RUTTAN,

VOLUME XX.]

THE PHANTOM BY CAPTAIN MARRYA

CHAPTER XVIII. Continued from the last H The fleet under Admiral Ryme was ordered to proceed to the Eastwestern route, through the Strainto the Pacific Ocean—it having h

into the Pacific Ocean—it having ed, notwithstanding previous far route afforded facilities which mi passage to the Spice Islands.

The vessels composing the fleet of forty-four guns, bearing the Ad Dort of thirty-six guns, with the pendant—to, which Philip was Zuyder Zee of twenty; the Young and a ketch of four guns, called The crew of the Vrow Katerin, between the two larger vessels; it smaller, were easier worked with between the two larger vessels; it smaller, were easier worked with Every arrangement baving been were hoisted up and the stips ruad days they were ballled by light victims to the scurvy increased board of Philip's vessel. Many thrown overboard, and others wer their hammocks.

The newly appointed Common

The newly appointed Commod was Avenhorn, went on board of report the state of the vessel, ar Philip had proposed to him, that the coast of South America, and bribery or force, to obtain supplies ish inhabitants or natives. But to ish inhabitants or natives. But to would not listen. He was an impostinate man, not to be persuade and with little feeling for the suffrencious of being advised, he jected a proposition, which, had it himself, would probably have be acted upon, and the Commodore rhis vessel, not only disappointed, the language used towards him. "What are we to do. Cantain "What are we to do, Captain You know too well our situation— we can continue long at sea; if y will be drifting at the mercy of the the crew die this wretched death nocks. At present we have for ten days more we shall probably
- for as the labour becomes more s
drop down the faster. Is it not by

rotten sheep?" "I perfectly agree with you, of lied Philip, "but still we must of admiral is an inflexible man." "And a cruel one. I have a g ompany during the night, and it will justify myself to the Direc

ves in combat with the Spaniar

"Do not do anything rash-per day he finds his own ship? eakened, he will see the necess A week had passed away after tion, and the fleet had made little each ship the ravages of the fatal re serious, and, as the Commodo

more serious, and, as the Commode he had but twenty men really able Nor had the Admiral's ship and the suffered less—the Commodore a board to reiterate his proposition. Admiral Rymelandt was not on Admiral hymeianat was not one vindictive man. He was aware of the suggestion made by his secondut, having refused, it, he would and he felt revengeful against to whose counsel he must either ado ing, he prevented from taking the vented from taking the sary for the preservation of his creess of his voyage. Too proud himself in error, again did he decithe Commodore went back to his were then within three days of the to the southward for the Straits of that night, after Philip had return Commodore went on deck and or of the vessel to be altered some powestward. The night was very dawas the only ship which carried so that the parting company of the perceived by the Admiral and the When Philip went on deck the ne found that their consorts were not looked at the company and perceived that their consorts were not looked at the company and perceived that their contracts the company and perceived that the company and perceived the company and perceived the company and perceived the company and the compan
