For the relief of suffering human beings who
may be afflicted, I beg you to ask—ask of those
who know—ask the H.n. Alfred Conklin, U. S.
Judge for that district, residing near Auburn; ask
Matthew J. Myers, Esq. Athens, N. Y.; ask Gen.
Duff Green, late of Washington city: each of
these gentlemen know of cases unconquerable by
all other remedies or physic:ans, though tried for
many years, that have been cured by the use of
the genuine Hays? Liniment. Thousands of other
per-ons know similar cures. We appeal to their
sense of justice—their human feelings.

It is but a duty you owe to your suffering fellow
beings to let this great remedy be known. Speak
of it then to all your friends. This will save
much pain where the newspapers are not read,
or where readers are incredulous, because so many
worthless articles are advertised for the same puiprise. To buyers we say, if all who have used it
do not say it is beyond all praise, then do not take
it. The proprietor will not allow this article to
be paid for unless it cures, when all the directions
are fully followed. Will any one suffering refuse
now to try it? If he does, he ought to be pitied
more for his obstinacy than his suffering.

Mr. Hays would never consent to offer this article, were he not compel ed by his sense of moral
—of teligious duty—to do all in his power for the
victims of distress and misery. For this purpose
he would sooner devote a fortune than se ure a
dollar for any worthless article.

THIS Medicine is undoubtedly the best specific ever invented for many diseases of the breast and lungs, and most of the bowel affections incident to our country. The summer and autumnal Diarrheas (commonly known by the term dysenteries) that yearly make such dreadful havor among children, sweeping thousands to their graves in spite of all the remedies usually prescribed, have in spite of all the remedies usually prescribed, have never yet been known to resist its efficacy. When never yet been known to resist its efficacy. When administered in that most distressing disease, the Cholera Morbus, it never fails to produce the most happy effects, if the dose be increased in quantity and frequency according to the violence of the symptoms, which ought and can always be done with perfect safety; and if any failure should occur it must be owing to a criminal negligence. It speedily relieves vomiting, gripings, flatulent and spasmodic cholics. Its anodyne properties render it peculiarly applicable in cramps, likewise restlessness and weariness of limbs. It is peculiarly useful for children when teething, as it allays irritation, induces moderate perspiration, and produces sleep.
