The tea market is beginning to be affected in a more marked degree by the intelligence lately communicated from China. The arrival of the treaty on Saturday, together with advices of the shipment on board of her Majesty's frigate Blonde of a portion of the money agreed to be paid for the indemnification of the opium destroyed, and the expenses of the war, although but a natural consequence of the previous occurrences made known, seems to have operated as a fresh the ck.

The trade was to-day exceedingly dull and spiritless, and prices were drooping. The transactions entered into were, however, not of a character or importance calling for a more detailed commentary.—The amount transmitted by the Blonde has been variously stated at from \$3,000,000 to \$5,000,000, but the precise sum does not anyear to have been executive with loes not appear to have been ascertained with

After the accounts which have been published of the return of poor emigrants to the United Kingdom from the American States, where employment for them was not to be procured, it seems astonishing that there should be still multitudes of others willing to try their fortunes in the New World. Almost every ship that leaves the docks, both here and at Liverpool, goes out full of steerage passengers, while others are coming in similarly freighted. There is at the present time, no prospect for emigrants of any class in the United States. There is no occupation for them, but, even if there were, wages are wretchedly low and payment uncertain.

It would seem advisable therefore, that persons who see no alternative but to expatriate themselves should in the present embartassed condition of the United States, look to other condition of the United States, look to other points as more likely to afford them support. Canada, as a British settlement most conveniently situated for their purposes, seems to command a preference, but there are numerous other canada and a preference. er colonies under the protection of the English laws, the least eligible of which should be tried rather than the country from whegee thousands are returning as from a resource which turns out to be utterly hopeless.

Although politics and nationality should be excluded som our municipal affairs, nevertheless as some scople are very busy on these topics, you perhips would like to know something of my origin and political sentiments. I was born and brought up in the ward for which I am offering, and am therefore a native Canadian; and as for my politics, I am, and altrays have been, a strong advocate for a liberal government as now constituted, and a warm opposer of the old tory monopols. For these principles I have been persecuted by the tools of the old family compact almost bryond endurance. But while on this subject, must not forget to acknowledge the favors I secsived from some of the honest portion of those who have been brought up and schooled in the oil system of politics here; for had it not been for some of them perhaps I should not now be here to offer myself for your suffrages. These honest onservatives I respect with all my heart, deeply beling my obligations to do so.

Genteuen, I hold no office or commission under firmer administrations; and I do not hesitate to state my firm conviction that had we received, in by-gone years, the blessings of a Government constituted like the present. Here no

The Proprietors are anxious to meet the wish a of many intelligent correspondents among the Working Classes, who represent that, notwith standing the great circulation and unparalleled

The Edition now announced, will, it is hoped, be allowed to put those marvellous performances within the reach of the masses. It is expected that the cittire Novels will comprise about 60.

To the above, it is only necessary for the Constitution Publishers to add, that the Edition is princed with beautiful type on excellent clear paper, and from the arxiety of the Proprietors of the Contright to protect it from piracy by the Uni-

and from the anxiety of the Proprietors of the Copyright to protect it from piracy by the United States Frinters, it will be issued at the remarkably low price of Ninepence, currency, per Part. It is sold in Britain at the same sum steriling. The Publishers can only look for profit from their being able to effect large sales, and should the present experiment of furnishing cheap reading to the Colonies succeed, they do not doubt but that other holders of valuable Converging a fill injustes the experiment. not doubt but that other holders of valuable confights will imitate the example set by the spir tited proprietors of the Waverley Novels, and the Provinces in future be supplied with all that jet excellent in the National Literature, on such except in the National Literature, on such moderate terms as will not cause any regret for the want of foreign, unauthorised Editions. Such a state of things will not only redound to the profit of the Colonies, but also to the British Author and Publisher.
