The management and collecting the Wild Land Tax in this District demand particular attention.—We have above one hundred and thirty thousand acres in the District which, at the present Assessed Rate, ought to produce above

ty thousand acres in the District which, at the present Assessed Rate, ought to produce above £500 per annum.

Last year the whole amount received only amounts to £50 5s. 54d.

Nothing but a more correct mode of accertaining the actual quantity of unoccupied land by annual Assessment, can ever bring this matter clearly before you. The remedy is simple and plain, namely by causing all the lands in each Township to be placed upon the Assessment Rolls, in numerical order, and handed to the Assessors, who will assess the Townships by Concessions, marking as usual the occupied and assessed property, and nothing against the wild plain, namely by causing all the lands in each Township to be placed upon the Assessment Rolls, in numerical order, and handed to the Assessors, who will assess the Townships by Concessions, marking as usual the occupied and assessed property, and nothing against the wild land, whether it be private property, or Crown, School, or Clergy lands,—when the rateable lands will be better known, and the amount due thereon carried from the Assessment Roll into the Treasurer's books and charged against said land accordingly.

The money appropriated by Government for the support of common Schools, for the year 1842, having been paid, with instructions for its distribution in due proportion to the number of children in the District under 16 years of age, taken from the Assessment Rolls of 1841, has been sub-divided accordingly, and carried to the credit of the several Townships, subject to the warrants of the School Commissioners, in favor of the Teachers, based upon the number of children taught, and the time which the school has been kept open during the year.

been kept open during the year.

Taking the Common School Act, in its true sense, and dividing the school money upon this just and equitable principle; the public will have just and equitable principle; the public will have the advantage of a sound moral education upon reasonable terms. The assessment required for covering an equal sum to the Government grant, reckoned upon the whole population is only 10d. a head, or if taken upon the occupied raieable property, 3ths in the pound. This simple plan of managing the school funds, will completely remove the difficulty of making assessments upon individual School Districts, and other obstacles which have bethere retarded the full

upon individual School Districts, and other ob-stacles which have hitherto retarded the full operation of the Education Bill.

Here then, if the internal system of the Com-mon Schools, be well conducted upon true Brit-ish principles, we have a certain, simple and cheap plan of providing a sound education, tend-ing to raise and ennoble the mind of the grow-ing generation, and training up the people of the whole country like one family.

whole country like one family.

A general Assessment By-Law expressly for school purposes will easily accomplish this great national object.

All which is submitted,

J. B. MARKS, Warden. 9th May, 1843.

The District Council closed its session about 3 o'clock, p. m., on Saturday. They passed a By-Law reducing the District-assessment to 1½d, on the pound; another altering the District Surveyors salary from £100 per annum to 15s. Surveyors salary from £100 per annum to 15s. per day when employed, and £25 per annum for 1 superintending District property; another granting a sum of money for repairing a bridge in Fredericksburgh; and another levying assessments for schools in certain School Districts. The Government grant for schools in this Districts for this year is £1130.

A correspondent of the Chatham Journal gives the following account of the flight of Mr. Wells, paymaster of the second battalion incorporated militia, with the money for paying the men. It will be seen that the government will not be losers, as the sureties have made up the deficiency.

On Tuesday, the 25th ult., Mr. Wells was known to have gone to Detroit. The passage of the lake ice for three days down the Detroit river, and the consequent interruption of inter-course between the two shores, accounted for his absence for that period. At his continued absence on Friday, an apprehension was felt by the Colonel and Officers of his illness in De-troit; to which place one of their dimber, was despatched; where, on inquiry, he was found to have taken stage for the interior, under an as-

adspaced and the interior, under an assumed name. Colonel Young, on being made acquainted with these facts, called on the sureties and informed them of the embarrassed position of the government; as Mr. Wells had taken with him some portion of the money intended for the ayment of the men of his Regiment, then about to be disbanded. These gentlemen, with a promptness and consideration hardly to be looked for in the present extreme scarcity of money, as nothing could have resulted from legal steps for some time, advanced the deficient sum of £300, on behalf of the government, and enabled have resulted from legal steps for some time, advanced the deficient sum of £300, on behalf of the government, and enabled the Colonel to proceed to the payment and discharge of the men, without a moment's loss of time. DEATH OF THE DUKE OF SUSSEX. We intimated, on the arrival of the Hibernia, an expectation that the Duke of Sussex would not recover from the severe attack of erysipelas under which he was laboring when she left Eng-land. ime. The good faith, generosity, and patriotism manifested by these gentlemen cannot be
discontinuities and commended; and will,
it is hoped, meet with a suitable acknowledgment from their government.

Mr. Wells enclosed to Mr. Baby, his title
deeds to his property in this Province, for his
protection; and left property which will, it is
supposed, exceed the amount "appropriated to
his own use," and the liability of the sureties.

Mr. Wells is generally acquitted of an intention
to defraud his government, or embayrasa his
friends; but is supposed to have left the Province from unlooked for domestic embarrassment.

NO MOSPETTS REQUIRED DOWN.

To Old Settlers, Emigrants,

AND OTHERS.

THE CANADA COMPANY offer about Energ Hundred Thousand Acres of their Lands mentioned in the printed List of this year, which are in Blocks containing from 2000 to 9000 Acres each, situated in the Western District, and in Scattered Lots, containing from 80 to 200 Acres each, situated in almost every Township in Canada West, on termis it is believed, the most liberal and advantageous that have yet been made public. By this new plan, the Company dispose of their Lands by way of Lease for a term of Ten Years.—

No Money being required down.

The Rents payable annually being only equal to the Interest upon the present upset value of the Lands—thus for example, suppose 109 Acres, being now worth 10s. per Acre is £50, the interest thereon is £3, which latter sum, and no more, is the amount of Rent to be paid each year—full power being secured to the Settier to Purchase the Freehold, and take his Deed for the Land be occupies, at any time during the Lease, when most convenient to himself, at a fixed advance tight the present upset price; and of course, thereby saving all future payment of Rents. Assuming the value to be as above, (10s. per acre,) the advance required for the Deed would be 1s. 3d., if paid within the first five years from date of Lease—or 2s. 6d. per Acre advance, if paid subsequently and previous to the expiration of the Lease. to the expiration of the Lease.

The Lands offered (excepting only the Park and Town Lots in Guelph) vary in price from 2s. up to 13s 9d. per Acre—the Rents upon which would be respectively as follows, viz.—

Upon 100 Acres upset price being 2s. per Acre, the whole yearly 0 12 0 and i more Upon 100 Acres upset price being 2s. per Acre, { Rent would be { nore.} }

In order to afford every assistance to industrious and provident Settlers, the Canada Company will receive any sum, no matter how small the amount may be, for which their Settlers may not have immediate want, on Deposit,—allowing Interest at the rate of Six per cent; per annum for the same; but it is clearly understood, that the full amount with interest accrued, shall at all times be at the disposal of the Settler's Provident or Savings Eank Account,"—thus affording to the provident Settler, every facility for accumulating sufficient money to purchase the Freehold of the Land which he Leases, whenever he chooses to do so, within the term of Ten Years; but should bad Harvests, or any other unforseen misfortunes visit him he has always the amount deposited, with Interest accrued, at his disposal to meet them.

The Lands are also to be disposed of upon the Company's former plan, viz.—for Cash down, or by One. fifth Cash, and balance in five equal Annual Instalments, with Interest.

The Company will remit from Canada any sum of money, however small the amount, to any part of the United Kingdom and Europe free of all charge. The Company will also remit any sum of money from Europe to Canada, by Letters of Credit upon their Commissioners in the Province free of expense, thus insuring the benefit of the premium of Exchange to the Emigrant, and likewise saving him from the inconvenience and too frequent loss arising fr

The Company, with a view to accommodate Emigrants having to immediate use for their funds, will allow Interest, at Four per Cent. per annum, for Money left with them for any period not less than Ninety Days,—the money, however, being always at the Emigrant's disposal, without notice. Every kind of information upon Canada, and directions, that can possibly be useful to intending Emigrants to Canada, will be readily furnished, free of all charge, by applying, personally or by letter, to the Company's Office in England,—Canada-House, St. Helen's Place, Bishopsgate-Street.
