TEARING DOWN & MOUNTAIN.

The Proudest Achievement of the Pan ama-A Contractor's Muge Tuck. Bubio Soldado is the proudest achieve-ment of the Papama Capal Company, and is indeed a great work. The bril is of solid rock, alternating at places in buge cobble bowlders. We are saluted with a following volley of 200 gun-cotton explosions to show how rapidly such work out be manipulated. On the smoke clearing off a really grand engineering feat meets the eye. Ledge upon ledge of sloring rock terroce tower up to the bighest point, about 280 feet. On several of the ledges stand rows of waggons, which were it not a holiday would be bastiy at wolk. We are at the bottom, and

is is necessary to ascend, which we

contrive by means of winding paths, M De Lesseps on & sure-footed maie, for the heat is intense. The contractor for the raising of this large mass is a Swiss of the name of Sonderegger, whose face is a sanguine and cheerful picture; as if the the policy of many of his colleagues, he is room. "Whew," said he, pancing, " that open and straightforward. The contract 2,000 000 cubic meters, he says, as i enjoying the ides; 1 200,000 of this has been done and only 800,000 remains. The rocky section is 500 meters long, about 80 feet broad at the bottom, sloping up to Vision." The subjects of the two yet to about 120 feet at the top, and the contractor further takes the swarthy ground as far as kilometer 33 Mr. Sonderegger answered me plainly that he had no doubt of completing his task by the end of next year. His mode of excavating is very ingenious. He first pierced a tunnel right through the mountain leading to the flat ground on either side. Above this tunnel large holes about three meters broad are made, four in all, at various points above the tunnel, the top being made funnel-shaped. The rocks are then blasted and rolled into these apertures, whose standing sides embrace a large circuit. Below a train of waggons is in waiting to receive the buge bowlders as they dash through. In this way four traffic cars are filled at once, and in a very short -Castor oil, dissolved with alcohol and | time the whole train moves away with its applied with a sponge, will render drawing. heavy load. Such is the practical and before using, the mixture being then wetter | lead pencil or Indian ink. Immersion of | tractor takes to diminish his huge task. No and rammed in layers. When arches or the paper in alcohol ramoves the oil, and wonder the company are proud of him and the crop is very uneven. In York and may be, is colored with bichromate of vaults are formed of this kind of cororete, the paper becomes opaque. The alcohol and were there many of his practical nature, who could show such good solid work the canal would gain many friends .-Panama Cor. Chicago Times.

They re Then he rushed off and covered himself this one was able to outsit every other pas. over with a newspaper, and it gradually came to him that in a burst of champagne enthusiasm he had proposed to Jennie in the corper of a secluded drawing-room at that reception, and there is no way out of it until he can get an excuse to quarrel with her and break it off .- San Francisco

They Met on Common Ground.

A well known member of Congress called upon the President Saturday for the purpose of presenting him to a newly married couple, constituents of his, who were anx. ious to see Mr. Cleveland. The member of Congress placed a marked emphasis in the introduction to the fact that the people he was presenting were newly married. He added with a flourish: "I commend them

to your attention.' The President said to the groom, as he gazed upon the bride, "I congratulate you, sir," shaking him warmly by the hand as

he spoke. The bridegroom blushed, and for a moment did not know what to say. Then he blurted out, " I hope the American people will soon have an opportunity to offer similar congratulations to you.' It was the President's turn to blush.
