THE LOVE OF TOBACCO

Prompts a Veteran to T. Tra Very Queer War Story.

"Tobacco! It's a blessing to mankind, aid the old veteran, as he hitched a little learer the sawdust box. "It cheers the sad; it consoles the weary and heavy-laden; it comforts the despondent; it lends hope to the hopeless; it makes the present enjoyable and the future rosy; it exhibarates the rich and makes the poor content. Yes, and occasionally it saves a life. Did I ever tell you of the time it saved mine? No? How did I overlook that reminiscence, wonder? Well, it starts off a good deal like an antique chestnut, for it happened when I was in Libby prison. Don't run a ay! I'm not going to tell you such and such a battle was won or how another could have been won, like the magazines are doing. Mystory is about tobacco. I was a prisoner, and was lolling in luxury as all the boys were at Libby. I wasn't having such a terrible time of it, though, for I had two big plugs of bluck tobacco, and I had a chum who didn't chew. You see there's such a thing as luck even in Libby Prison. My chum was the nicest fellow I ever knew. company -neither smoked, chewed, drank nor cussed. He was a model. Still he was a prisoner just like any common every-day chap, and it was about an even thing for a good while as to our living through our imrisonment or dying there, as scores of the boys were doing right along "One day the news got abroad among

pushing on toward Richmond, and they were about to shout for joy when another rumor swept through the prison that the rebs were about to ship a lot of us to Salisknew that if they once got to Salisbury there would be no chance for them. It was nounced Salisbury infinitely more horrible. I didn't care about jumping out of the fry-ing-pan unless I knew I could escape the fire, so I thought I would fix up a scheme to stay right there. I called my chum and told him that our only chance of living was in staying where we were. 'Now,' says I, 'if we can get sick enough to get into the hospital they can't move us. I'm going to eat this plug of tobacco and get sick on it if I can.' I gave him the other one and told him to do the same. He tried it, but couldn't swallow the first bite, try how he might. He smiled in a patient kind of way, and said that he'd have to take his chances. I ate my plug. though-swallowed every bit of it-and may I be blessed if it made me sick a bit. I waited for effects, and when I saw the doctor coming my way I tried to play sick, out he was too smart for me and wouldn't have it. I was disgusted with my attempt, and thought I would just take chances, same as my chum. I had some bread-Frusts, and I burned them black and made ome coffee from them-we called it coffee and drank a lot of that, wondering all he time why my stomach hadn't rebelled when I ate that plug of tobacco. But as oon as I had swallowed that hot offee I heard from the tobacco right

away. There was a row in my stomach equal to a Mexican revolution, and began to roll and kick and double up with such energy that the doctor saw me from a distance and came and examined me. He didn't notice that I was the same fellow that he had caught shamming, and he knew at a glance that I wasn't putting it on this time, so he

ordered me to the hospital. "The very next day they sent a trainload of our fellows on to Salisbury, and among them was my chum. About two weeks after that I was exchanged with a lot of others, and got back in the Union lines. died there. That's true-every word of itwhich is more than you can say for the majority of war stories nowadays. I figure take a regiment of Concord philosophers to make me believe anything else. Gi' me a chew, kurnel," and the "vet" threw his worn-out quid at the Maltese cat under the
