Mr. Jos. Knapp's handsome cheese factory is a standing evidence of the adaptability of the valley to successful dairying. Its prospects for the coming season are very bright. The pleasing exterior is surpassed by the internal order, taste and cleanliness. The machinery, vats, floors, etc., bave just been repainted, giving additional

airy freshness and purity, so desirable in dairy work. The efforts of the Rev. Mr. Sheldon in rebuilding the Baptist church here, and in endeavoring to arouse that denomination to greater activity and usefulness, have met with divine as well as human approbation, and have

been crowned with marked success. A number of the friends of Mr. Bullis drove down from Brighton for the purpose of having a grand sleigh ride and a good time generally. They employed themselves in looking up old acquaintances, taking in a number of oyster suppers, and engaging in There were two funerals from this anything which would afford amuse-

rendevouz for lovers of horses, who

come from miles around for the purpose of matching their horses or trading, as the case may be. If Mr. Bullis cannot accommodate those who come for this purpose, he can generally direct them to where their wishes can be gratified. So general is the good feeling and satisfaction, that the business seems to be fast growing in favor with the people. And why shouldn't it? Why not deal hopestly in this business as well as in others ! "Young Warrior" is more than himself this spring, both in appearance and action, and will probably book more this season than ever before, The reason for this is the !high value set upon his stock. Several of his colts have sold for high prices. A foal of his, a year old and past, now standing in the same stable, in 154 hands high, and gives great promise of high speed. Mr. Bullis has no wish to part with the colt. It was intended to put "Young Warrior" on the track last season, to increase his speed, but unfortunately an accident put off the carrying out of this intention until the present season.

The people of this valley are generous, frank and friendly, and in their intercourse with one another retain much of the warm-hearted, old-time ways. They have not yet been run into the cast steel mould of an exnot yet quite ready to say
