account of the coldness of the water.

THE SICK CHILDREN. The Things to do for Them When Away From Home and Physician. The young mother who is far away from a physician may remember for her comfor that a child very seldom really requir medicine, says the Ladies' Home Journal What it needs is what she can give with out danger-proper food, pure air, cleanl ness and rest. Most of the disorders of children, particularly of infants, arise from serve derangement of the digestive tract had food is not of proper quantity quality. It is not assimilated; that taken up by the blood for the nourishmen of the tissues, and the child suffers. It pale and fretful, throws up its food in undi gested masses and does not thrive san healthy child should. The first thing to b done is to change the food. Add a table spoonful of water to each six of food; this does not succeed, try using one-fourth cream instead of all milk with water. Vary Albert Wheeler, aged 22 years, charged the strength of the food by adding more or | with criminal assault on 10 year-old Edna less water. If still successful try some of Brown, in the first concession of Sidney the artificial foods until one is found that township, on July 12th, was called at the does agree with the baby. With older Police Court yesterday. It is probably the children an error of diet is very apt to be most beinous case of its kind ever reported followed by feverishness and restlessness, in Ontario, and the court-room was crowded High temperature does not mean as much to suffocation when it was called.
