Brownie Pre-Registration

Due to the overwhelming number of girls wanting to join Brownies last year, we are holding a pre-registration for the 1992-93 season.

If your daughter is 6 and no older than nine by December 31, 1992 and enjoys crafts, games, trips, hiking, nature, camping, songs, then come and join us for fun and adventure!

WHEN: April 16 6:00pm - 7:30pm

WHERE: Seeley's Bay Legion
 or call Liz at 387-3979 for more information.

We are also looking for women to volunteer as leaders.

The Corporation of the Township of Rear of Leeds and Lansdowne

1992 DOG LICENCES

In this Township, ALL DOGS, 6 months and older, MUST, by BY-LAW be licenced. Licences are available and due JANUARY 1, 1992. DOGS ARE NOT TO RUN AT LARGE. Services of a dog catcher are available by telephoning the Municipal Office (928-2423). Impounded dogs are placed in Riverdale Kennels near Athens and certain fees are charged upon redemption. Licences may be purchased at the Municipal Office or you may mail in this form, with your cheque or money order, payable to the Township of Rear of Leeds and Lansdowne, Box 160, Lyndhurst, Ontario, KOE 1N0.

The fee, set by By-Law 20-1990, is FIVE DOLLARS AND TWENTY-FIVE CENTS (\$5.25) for EVERY DOG, male, female, spayed or neutred. Dog licences are exempt from GST.

NOTE: If you are sending for a dog licence, please do not include taxes for your property. They must be kept separate.

A Crushing Need

Now that recycling is well-established in the Township of South Crosby and the recycling habit is growing, the focus of your local recycling committee is shifting to improving the efficiency of existing programs, while adding new dimensions to these programs. In terms of new dimensions, an application has been submitted to the Ministry of Environment to enable the purchase of home composter units for South Crosby residents. Watch for details of this initiative in the very near future.

In reviewing the overall recycling program in South Crosby, one is struck by the impressive volumes of materials deposited for recycling. From April of 1991 through December of 1991, the blue bins accounted for a total of 77.5 tons of recycled materials: Newsprint - 45.9 tons; Steel Cans - 8.3 tons; Aluminium Cans - 1.2 tons; Glass - 18.4 tons; PET Bottles - 3.7 tons. This is an impressive list! Each ton of recycled material greatly reduces the volume of material deposited in the landfill and greatly extends the life of the landfill site. However, the actual costs of recycling are also impressive. Transportation costs alone amount to nearly \$5,000.00 for the above materials. Directly (municipal taxes) or indirectly (grants from M.O.E.), our taxes pay the lion's share of these costs. Therefore, it is in our best interest to make the recycling program as efficient as possible.

One improvement we can make quite easily is to crush all cans placed in the blue bins. By crushing, the weight per volume of steel and aluminium cans can be increased by a factor of five! Since trucking costs are the same for cans, whether crushed or uncrushed, it makes sense to crush cans so that we pay for hauling steel or aluminium rather than air surrounded by a bit of steel or aluminium. After all, a given volume of uncrushed cans is mostly air!

Recycling guidelines ask that you flatten or crush all cans. It makes sound economic sense to do this. Removing tops and bottoms of cans where possible and flattening them is recommended as a space-saving and cost-saving measure.

Do your part to help make our local recycling programs work - we all save in the long run!

Two stacks of 50 pop cans - left, uncrushed; right, crushed
 Crushing saves money: Recycle metal not air!
