## The best-looking, best-performing 16' bass boat on the water.

First came the Fisher® GT-18 Grey Thunder, the bass boat BASSMASTER magazine called "a real head-turner," the one VACATION PROPERTIES JOURNAL said is "in all respects a well-designed professional bass rig, the most surprising new boat of the year."

Now—in the tradition of the Grey Thunder 18—Fisher introduces Grey Thunder 16, designed and built to out-fish anything in its class.

Out of the hole, all they'll see is your stern light. The guys running 'glass 16-footers probably will have to get used to seeing you out front all the time. And with its shallow draft, Grey Thunder will get you back in the shallows, where the others can't go.

Then there's the important stuff, the stuff that makes a fishing boat a *real* fishing boat. Did you ever see such a large fishing platform on a 16-foot rig before? This boat has all kinds of fishing room, even on the rear deck.

And check out all the great Fisher Features it offers. Like Unit-Frame™ construction, all-aluminum decks and floors, tournament-tested pedestal bases welded to the bottom of the boat, and the smooth, dry ride of Fisher's Semi-Vee hull and Wave-Tamer™ bow.

Most boats are a compromise, but none can deliver as many of the things a boat really needs as the Fisher SV-16 GT: Light, quick, dry, stable, comfortable, fishable, tough, classy, affordable and very good looking.

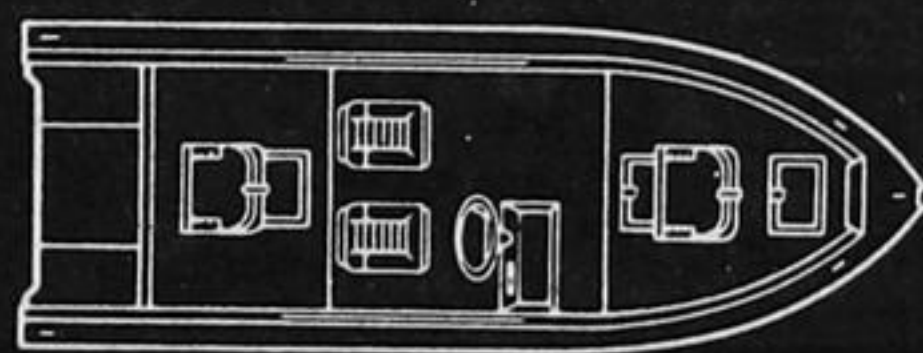

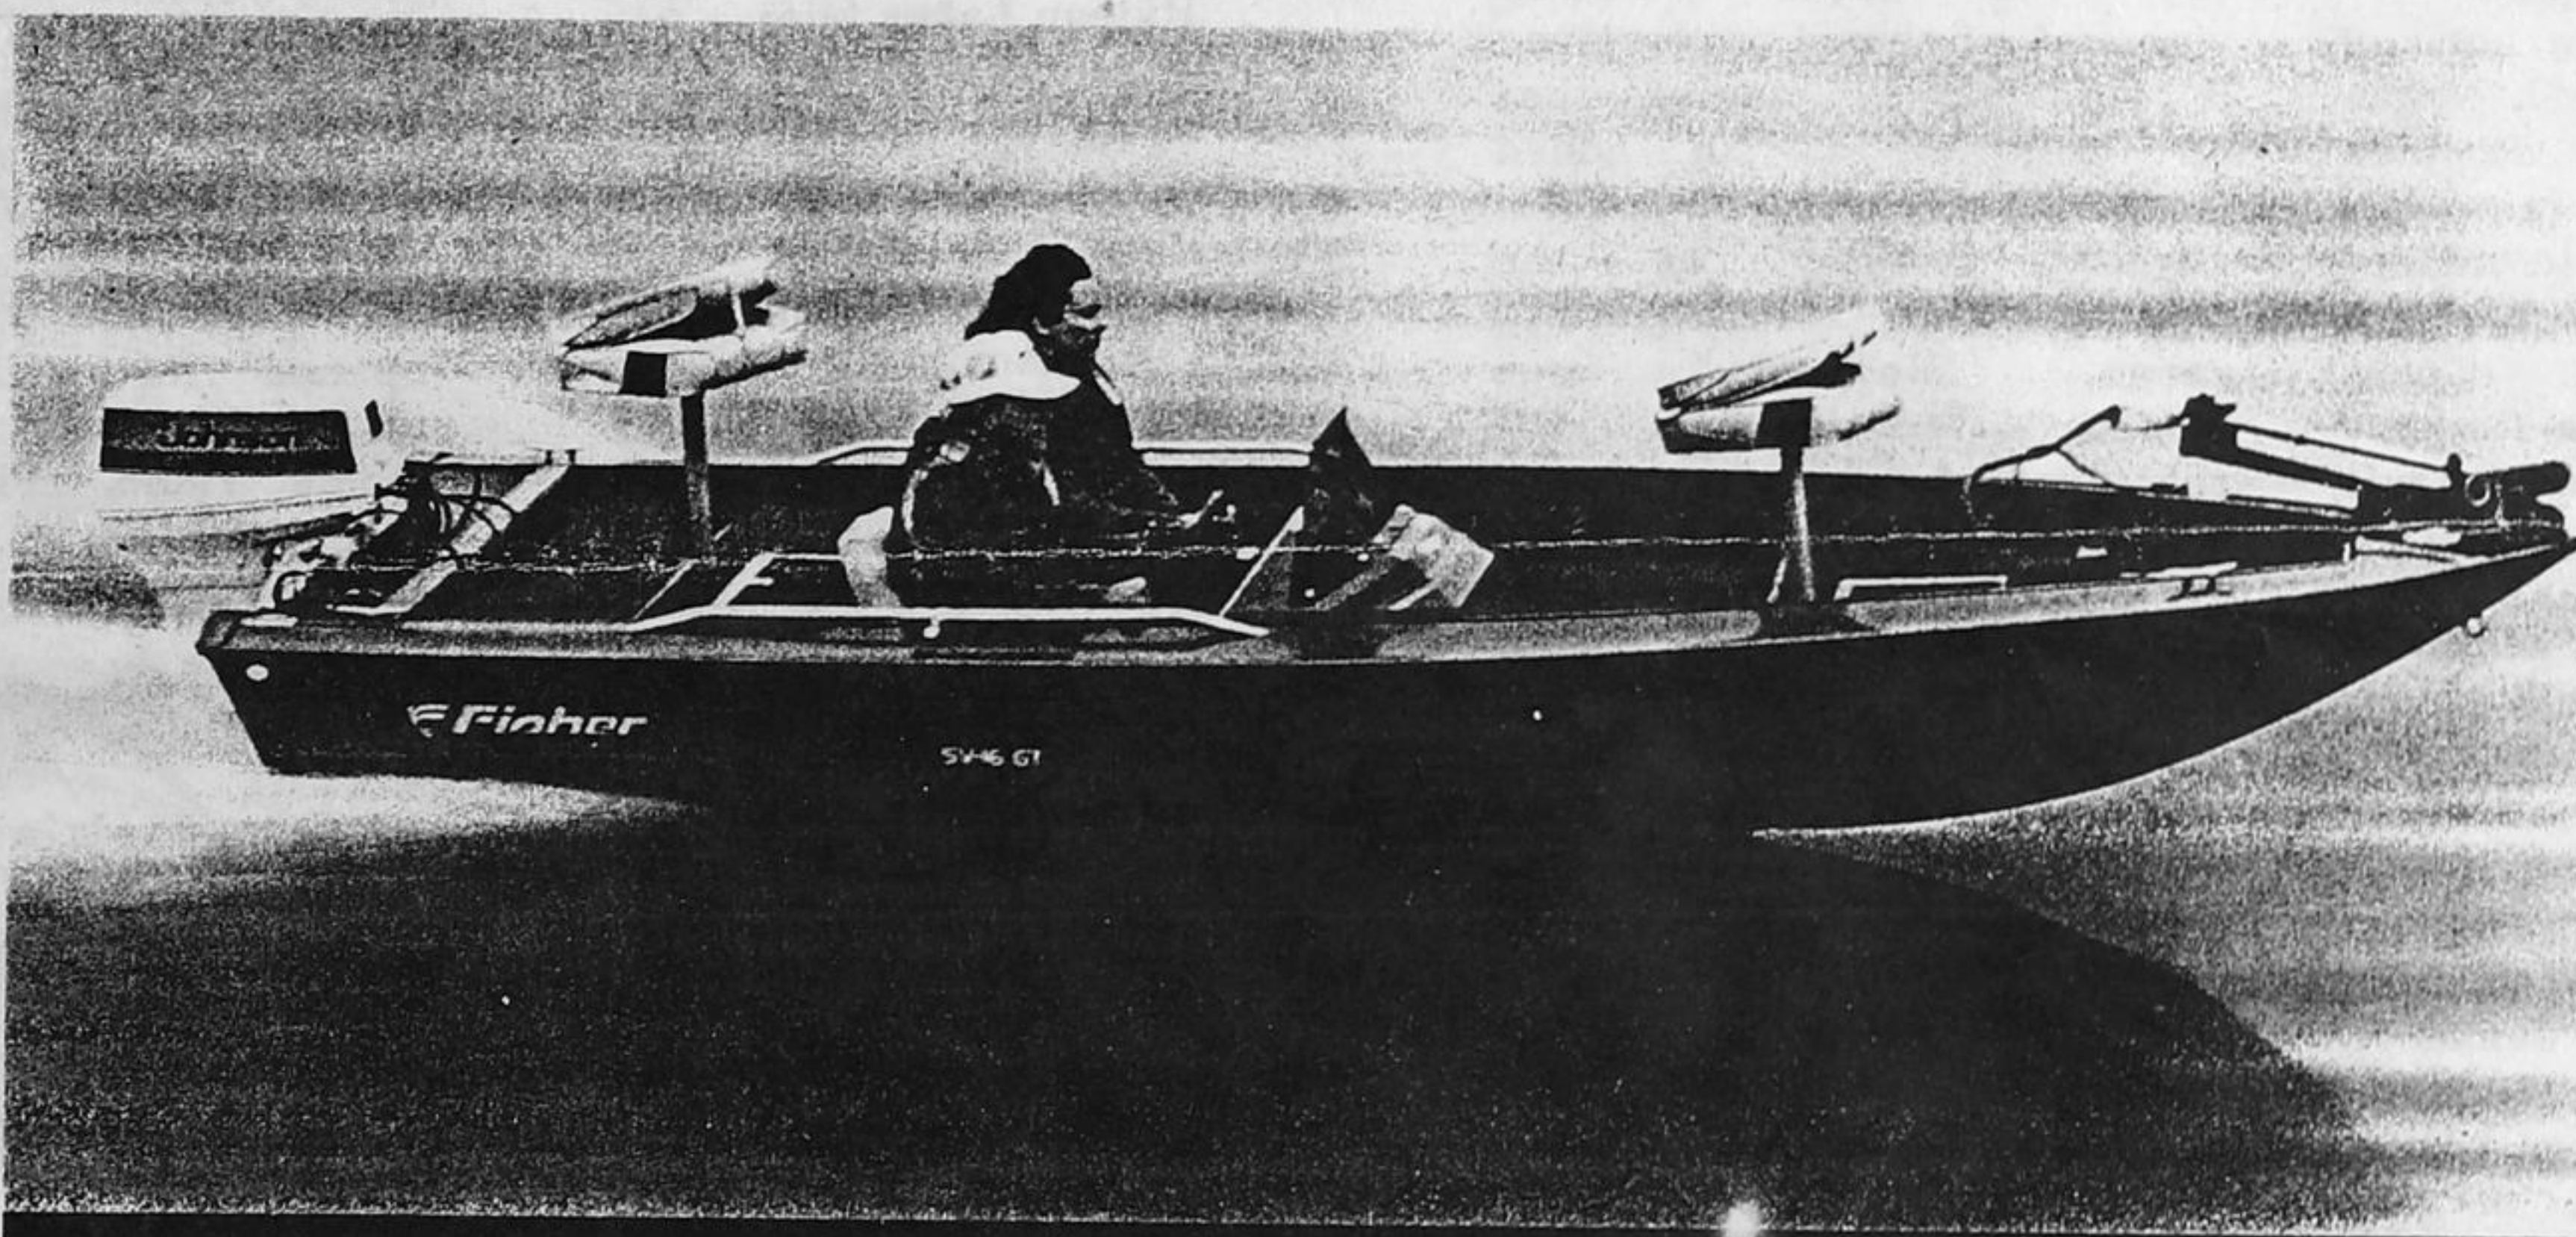

Fisher's Grey Thunder 16. Aluminum has never been this good!
