

of the needs of the residents. To spend nothing to have nothing is not exactly progressive. The ability to spend frugally and get what the residents of an area desire or need is better sense. To achieve this goal often means work...work to keep informed of every available grant, every available dollar to be issued by the higher levels of government, and to fight for such funding as seen necessary from the higher levels of government.

It is not easy being a municipal politician! It requires hard work, dedication, an ability to deal with all people fairly and without discrimination or personal bias. It means making dollars go further than they have ever gone before. And above all, it means listening to the people you represent...not just before the election, but for the next three years!

Before you make that secret ballot box decision, check your candidates out. Have they got the experience and the commitment to meet your needs over the next three years? Will they meet the needs of all residents of the municipality fairly and equitably. Will

they look ahead and endeavour to have your township move ahead, rather than stand still or fall behind due to a no-spend fiscal policy?

Think before you vote....BUT vote! It is a right which you should utilize! And, if you don't vote...remember, you really shouldn't be allowed to gripe about the actions of council for the next three years!
