Used fuel from Canada's nuclear reactors, when disposed of in a deep geologic disposal vault would not pose any significant hazard to man at any time, suggests an Atomic Energy of Canada Limited report.

The report says that, while an analysis of the long-term impact of an immobilized fuel disposal vault is preliminary in nature, studies made so far support the view that nuclear fuel wastes can be safely disposed of by deep underground burial in a geologically stable hard rock formation.

The results of the analysis are contained in the Second Annual report of the Canadian Nuclear Fuel Waste Management Program, AECL-6804, released in December, 1980. The report notes that the program is now well established with participation from a wide cross-section of Canada's scientific and engineering community. In some areas, work has not proceeded at the pace originally envisaged. The limited resources available, and the inability to gain approval for additional field research areas, has restricted geotechnical research to one type of hard rock formation (granite). Nevertheless, significant progress has been made over the past year, according to the report.

As the program has developed, the report notes, it has become evident that geotechnical experiments are needed on a scale and in an environment that can only be achieved underground. Therefore, proposals are being made to build an underground research laboratory near the Whiteshell Nuclear Research Establishment. Several other countries have shown interest in the laboratory, which will not involve the use of radioactive waste materials at any time.

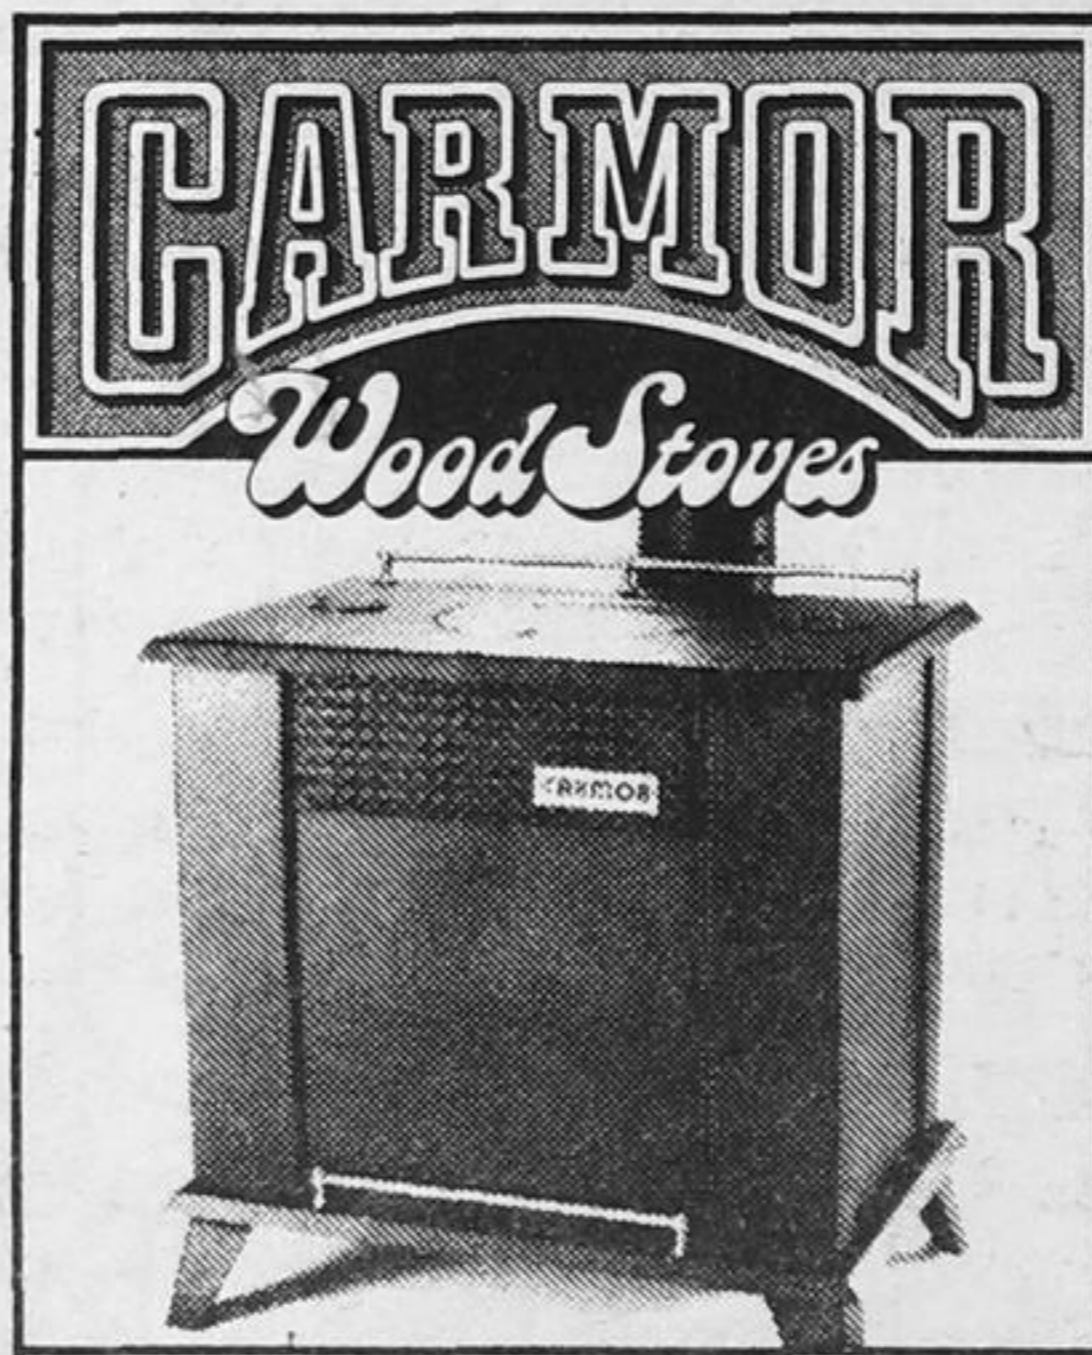

The report, AECL 6804, summarizes the fuel waste management research projects conducted during the year and the results that have been obtained so far. Single copies of the report are available without charge from the Scientific Document Distribution Office, Atomic Energy of Canada Limited, Chalk River, Ontario, KOJ 1J0.

QUALITY PRODUCTS QUALIFIED SERVICE COMPETITIVE PRICING

FIRST NOTICE REGARDING DOG LICENSING FOR YEAR 1981

TOWNSHIP OF REAR OF LEEDS & LANSDOWNE

Dog tags and licenses for 1981 are now available at the Township Office during office hours. Every dog that has attained the age of 6 months is required to be licensed.

The fee is: for each male or spayed female if only one is kept \$3.25
for each additional male or spayed female \$5.25
for a female dog if only 1 is kept \$5.25
for each additional female \$7.25

The license and tag may be obtained by mailing the following information and cheque or money order to the Township at Box 160, Lyndhurst, Ontario, or you may call in person if it is convenient.

NAME OF DOG _____ SEX _____

BREED _____ AGE _____

COLOUR _____ DISPOSITION:
(Friendly or Watchdog)

NAME OF OWNER _____

ADDRESS _____
