THE GREEN GRASS UNDER THE SNOW The work of the sun is slow, But, as sure as heaven, we know;

So we'll not forget, When the skies are wet, There's green grass under the snow, When the winds of winter blow Wailing like voices of woe,

There are April showers, And buds and flowers, And green grass under the snow. We find that it's ever so. In this life's uneven flow ; We've only to wait,

In the face of fate.

Col. Nathaniel J. Cooling-better known as Cool Nat - of Cool ington, San Joaquin County, in the State of California, was a fellow passenger of mile on that well known trans Atlantic steamship, Magnolia, famous alike for the of her excellent commander. is, or rather was, invariably the case, the Magnolia had received a very good "send off," the friends of the passengers mustering in their hearty wishes for a swift pas-

whose name I have mentioned. Dim rumors of tharing deeds done during the early days of the Golden States, had reached my ears from time to time, and with many of these the name of Nat Cooling was associated. Of the origin of this great man but little was known. A.l that was certainly known was that the Colonel thined up in Califorma during the first symptoms of the gold fever, and that his speculitions in mining, etc., had been athis appearance nor his speech betraved his supposed nautical antecedents, nor did his outline betray the numerous angles that American physique is often credit ed withal. He was a plump broad shouldered man, the said broad she ulders being surmounted by a large bullet-head! covered with close cut crop of stiff, black hair. His face, with the exception of the upperlip, was clean shaven, and his general expression was one of

frank bouhomie There were moments, however, when a singular expression flashed from his fine dark eye, atd on these rare occasions it was not difficult for persons of an imaginative turn the summer seas of the Indian Archipelago with a scuttled ship slowly settling down in the dark, blue water and a rakish looking craft almost hull down upon the

Col. This was not merely a large diamond, but a brilliant such as is rarely seen. threw out flashes like a lime-light, and blazed with almost intolerable radiance. One splendid summer afternoon, as the Magnolia was doing her best to make short work of the Atlantic, the Colonel caught my eye fixed in allmiration on his magnificent jewel and launched at once into the following story
